General Capabilities

Critical and creative thinking

In the Humanities and Social Sciences curriculum, students develop their critical and creative thinking as they investigate civics and citizenship, economic and business, geography and history information concepts and ideas through inquiry-based learning. The effective development of critical and creative thinking in Humanities and Social Sciences enables students to learn to apply concepts and skills to new contexts and endeavours. Students build their inquiry skills as they learn to develop and clarify investigative questions, and to assess reliability when selecting information from diverse sources. Students develop analytical skills by using evidence to support an argument or position on a social, cultural or political issue. They interpret and analyse economic data and information and apply discipline-specific knowledge and understandings as they draw conclusions and propose solutions to complex problems.

Students develop creative thinking dispositions when they are encouraged to be curious and imaginative in investigations and field work, when considering multiple perspectives about issues and events, and when thinking deeply about questions that do not have straightforward answers. They imagine alternative futures in response to social, environmental, civic, economic and business challenges that require problem-solving and innovative solutions. They propose appropriate and alternative courses of action and consider the effects on their own lives and the lives of others.

Digital literacy

In the Humanities and Social Sciences curriculum, students develop digital literacy when they locate, process, analyse, evaluate and communicate civics and citizenship, economic and business, geography and history information. Students access and use digital literacy, including spatial technologies, as an investigative and creative tool. They seek a range of digital sources of information to resolve inquiry questions or challenges of historical, geographic, civic, economic and business relevance, being aware of intellectual property. They critically analyse evidence and trends, and critique source reliability. Using digital literacy, students present and represent their learning, and collaborate, discuss and debate to co-construct their knowledge. They plan, organise, create, display and communicate data and information digitally, using multimodal elements for a variety of reasons and audiences.

Students enhance their digital literacy by exploring the increasing use of technology and the effects of technologies on people and places, and civic, economic and business activity. They learn about social media as a tool to collaborate, communicate and share information, and build consensus on issues of social, civic, economic, business and environmental significance, while using an awareness of personal security protocols and ethical responsibilities.

Ethical understanding

In the Humanities and Social Sciences curriculum, students develop ethical understanding as they investigate the ways that diverse values and principles have influenced human activity. As students develop informed, ethical values and attitudes, they explore different perspectives, ambiguities and ethical considerations related to social and environmental issues. They discuss and apply ethical concepts, such as equality, respect and fairness, examine shared beliefs and values that support Australian democracy and citizenship, and become aware of their own roles, rights and responsibilities as participants in their social, economic and natural world.

Intercultural understanding

In the Humanities and Social Sciences curriculum, students develop intercultural understanding as they learn about the diversity of the world's places and peoples, and people's lives, cultural practices, values, beliefs and ways of knowing. They learn the importance of understanding their own and others' histories, recognising the significance of the histories and cultures of Aboriginal and Torres Strait Islander peoples, and the contributions of Australian migrants. They demonstrate respect for cultural diversity and the human rights of all people.\
Students learn of Australia's economic and political relationships with other countries and the role of intercultural understanding for the present and future. As they investigate the interconnections between people and the significance that places hold, they learn how various cultural identities, including their own, are shaped. They reflect on their own intercultural experiences and explore how people interact across cultural boundaries, considering how factors, such as group membership, traditions, customs, and religious and cultural practices impact on civic life.

Literacy

In the Humanities and Social Sciences curriculum, students develop literacy capability as they learn how to build knowledge in relation to civics and citizenship, economic and business, geography and history information, concepts and ideas. Students progressively learn to use a wide range of informational, persuasive and imaginative texts in multiple modes. These texts include stories, narrative recounts, reports, explanations, arguments, debates, timelines, maps, tables, graphs and images, often supported by references from primary and secondary sources.

Students learn to make increasingly sophisticated language and text choices, understanding that language varies according to context, which reflect the nature and stages of their inquiry. They learn to use language features and text structures to comprehend and compose cohesive texts about places, people, events, processes, systems and perspectives of the past, present and future. These include topic-specific vocabulary, appropriate verb tenses, and complex sentences that describe sequential, cause-and-effect and comparative relationships. Students recognise how language and images can be used to make and

manipulate meaning. They evaluate texts for shades of meaning and opinion. Students also participate in debates and discussions and develop a considered point of view when communicating conclusions and preferred social and environmental futures to a range of audiences.

Numeracy

In the Humanities and Social Sciences curriculum, students develop numeracy capability as they apply numeracy skills in relation to civics and citizenship, economic and business, geography and history inquiries. Students count and measure data and information, construct and interpret tables and graphs, and calculate and interpret statistics in their investigations. Students learn to use scaled timelines, including those involving negative and positive numbers, as well as calendars and dates, to recall information on topics of historical significance and to illustrate the passing of time. They collect data through methods such as surveys and field tests. They construct and interpret maps, models, diagrams, and remotely sensed and satellite images, working with numerical concepts of grids, scale, distance, area and projections.

Students learn to analyse numerical data to make meaning of the past, to test relationships in patterns and between variables, such as the effects of location and distance, and to draw conclusions. They make predictions and forecast outcomes based on civic, economic and business data, and environmental and historical information, and represent their findings in numerical and graphical form. Students use numeracy to understand the principles of financial management, and to make informed consumer, financial and business decisions. They appreciate the ways numeracy knowledge and skills are used in society and apply these to hypothetical and real-life experiences.

Personal and social capability

In the Humanities and Social Sciences curriculum, students develop personal and social capability (self and social awareness) as they gain an understanding of people and places through civics and citizenship, economic and business, geography and history inquiry. Through learning experiences that enhance reflective practice, students develop an appreciation of the insights and perspectives of others. They develop understanding of what informs their personal identity and sense of belonging, including concepts of place, and their cultural and national heritage.

Learning through inquiry enables students to develop self-management skills by directing their own learning and providing opportunities to express and reflect on their opinions, beliefs, values and questions. Social management skills are developed as students collaborate with others to make informed decisions, show leadership and demonstrate advocacy skills to achieve desired outcomes, and contribute to their communities and society more broadly.

Pre-primary

Year Level Description

In the early childhood phase of schooling, learning, development and wellbeing are connected and learning builds on the Early Years Learning Framework and each child's funds of knowledge. A holistic curriculum that integrates knowledge, understandings, skills, values and attitudes across learning areas connects learning to children's lives and their natural curiosity about their world.

Humanities and Social Sciences provides opportunities for children to make sense of their world through experimentation and play.

In Pre-primary, children explore, play, investigate, and communicate their understandings through a range of intentional learning experiences in creative ways. They have the opportunity to pose questions about, and respond to their natural curiosities. Children collect, sort, represent and record information into categories.

Children gain a sense of location and learn about the globe, as a representation of the Earth, on which Australia and other countries can be located. There is a focus on fostering their interest in their personal world, with connections made between the early childhood setting and the local community. In the context of children developing a sense of identity and belonging, children investigate the features of familiar places, and explore what makes a place special, including its significance to Aboriginal and Torres Strait Islander peoples.

Children engage in stories of families and the past, which may include stories from different cultures and other parts of the world. They perceive that the past is different from the present and understand the many ways in which stories may differ, depending on who is telling them. In the early years, children have the opportunity to explore family structures, their heritage, culture, backgrounds and traditions.

Achievement Standard

By the end of the year:

Children pose and respond to questions, and recognise that there is a variety of sources from which information can be collected. They use simple categories to organise information and sequence familiar events. Children represent information in different ways and begin to draw simple conclusions. They share observations and ideas when participating in the decision-making process. Children develop simple oral texts, and reflect on what they have learnt using language, gesture and other non-verbal modes.

Children recognise that countries, such as Australia, and familiar places, are represented on a globe or a map. They describe the features of places that are familiar to them. Children identify the interconnections that people have with familiar places and recognise why some places are special. They identify similarities between families and suggest ways that families communicate and commemorate significant stories and events from the past.

Content Descriptions

Knowledge and understanding

Geography

The globe as a representation of the Earth on which Australia and other countries can be located

For example:

- concrete representations to locate places and landmarks
- representations using digital technologies such as online maps

WAPHAKUG1

Numeracy

The location of familiar places on a map

For example:

- local places such as parks, schools and shops
- maps such as pictorial, self constructed and digital

WAPHAKUG2

Numeracy

The places people live in and belong to, the reasons places are special or important to people and their significance to Aboriginal and Torres Strait Islander peoples

For example:

- people live in neighbourhoods, suburbs, towns and rural/regional/lands
- the Country/Place on which the school is located
- the Country/Place to which students' culture or heritage is connected

WAPHAKUG3

Critical and creative thinking Intercultural understanding

History

The different structures of families, the people in their family, their culture, where they were born and raised, and how they are connected to each other

WAPHAKUH1

Personal and social capability Intercultural understanding

The celebrations and commemorations of significant events shared with their families and others

For example:

- celebrated events such as birthdays, cultural festivals and family reunions
- different commemorations in the local community
- Aboriginal and Torres Strait Islander peoples participate in corroborees

WAPHAKUH2

Personal and social capability Intercultural understanding

How the stories of families and the past can be communicated and passed down through generations and how the stories may differ, depending on who is telling them

For example:

- photographs, artefacts, books, oral histories, digital media and museums
- the significance and use of storytelling on Country

WAPHAKUH3

Personal and social capability Intercultural understanding

Humanities and Social Sciences skills

Questioning and researching

Share prior knowledge about a topic

For example:

- make and apply connections through play-based learning
- collaborative learning strategies
- sustained shared thinking

WAPHASKQ1

Literacy Critical and creative thinking

Pose and respond to natural curiosities about known objects, people, places and events

For example:

- 'I wonder …'

WAPHASKQ2

Literacy Critical and creative thinking

Sort and record information and/or data into simple categories

For example:

- drawings, pictorial timelines and maps
- role-play
- whole class learning wall

WAPHASKQ3

Literacy Numeracy Critical and creative thinking

Analysing

Explore points of view

For example:

- recognise that their point of view may differ from others

WAPHASKA1

Literacy Personal and social capability Intercultural understanding

Evaluating

Draw conclusions based on discussions and/or observations

For example:

- indicate conclusions in non-verbal ways such as drawing, making or gesturing
- use an opinion to make a judgement

WAPHASKE1

Literacy Critical and creative thinking Personal and social capability

Participate in decision making processes

For example:

- engage in group discussion
- make shared decisions
- share views

WAPHASKE2

Literacy Critical and creative thinking Personal and social capability

Communicating and reflecting

Share observations and ideas, using everyday language

For example:

- oral retell or role-play
- drawing
- sustained shared thinking

WAPHASKC1

Literacy Critical and creative thinking Personal and social capability

Reflect on and assess learning and thinking

For example:

- use play to investigate, experiment, test hypotheses, imagine and explore ideas
- articulate their thoughts when they are learning new things

WAPHASKC2

Literacy Critical and creative thinking Personal and social capability

Year 1

Year Level Description

In the early childhood phase of schooling, learning, development and wellbeing are connected and learning experiences are informed by the Principles and Practices of the Early Years Learning Framework. A holistic curriculum that integrates knowledge, understandings, skills, values and attitudes across learning areas connects learning to children's lives and their natural curiosity about their world.

Humanities and Social Sciences provides opportunities for children to make sense of their world through experimentation, exploration and play.

In Year 1, children have a natural curiosity about their physical, social and technological world. Children are provided with a holistic and integrated curriculum through which they build, design, problem-solve, represent and reflect on new learning in ways that are meaningful to them. Children have the opportunity to investigate different ways of collecting information and/or data through a range of intentional learning experiences, books, people and photos. They learn how narratives can be used to communicate and represent their changing understandings in multiple ways.

In the early years, children have the opportunity to develop an appreciation for both natural and constructed environments as they understand how places are cared for by different groups, including Aboriginal and Torres Strait Islander peoples. Children's understanding of place is further developed through investigating maps as a visual representation of Earth, as they begin to locate geographical divisions.

The concept of continuity and change is extended through exploring how family life has changed or remained the same over time, and how the present is similar to, or different from, the past. The understanding of time as a sequence is developed in the context of the present, past and future.

Achievement Standard

By the end of the year:

Children pose questions, locate, sort and record collected information and/or data from provided sources. They process relevant information and/or data by categorising, sequencing events and exploring points of view, and use this information to draw simple conclusions. They participate in decision-making processes by contributing to group discussions. Children share their findings in a range of ways, using some relevant terms. They reflect on what they have learnt using oral and/or written forms.

Children categorise the natural, managed and constructed features of places. They describe how the features of places can be cared for and changed over time and they locate the Equator and the Northern and Southern Hemispheres. Children describe how families have changed or remained the same over time. They describe how daily lives change over generations, and consider the personal significance of events in the present, past and future.

Content Descriptions

Knowledge and understanding

Geography

The location of the equator and the northern and southern hemispheres, including the poles

WA1HAKUG1

Numeracy

The location of local places and their natural, managed and constructed features

For example:

- identify and locate places and features on pictorial maps
- the daily and seasonal weather of their place

WA1HAKUG2

Numeracy **Critical and creative thinking**

How places change and how they can be cared for by different groups including Aboriginal and Torres Strait Islander peoples

For example:

- the influence of weather and seasons, including Aboriginal and Torres Strait Islander peoples' seasons
- causes of change to places such as erosion, revegetation, new infrastructure, the influence of weather patterns
- how places and locations are cared for and the community members responsible

WA1HAKUG3

Critical and creative thinking **Personal and social capability** **Intercultural understanding**

History

The diverse structures and sizes of families, the familial roles today and how these have changed or remained the same over time

For example:

- the similarities and differences of a range of family structures and sizes
- changes in family roles such as childcare and domestic chores
- naming protocols for family and community members across cultures

WA1HAKUH1

Critical and creative thinking **Personal and social capability** **Intercultural understanding**

How the present, past and future are represented by terms indicating time as well as by dates and changes that may have personal significance

For example:

- terms, including 'a long time ago'; 'then and now'; 'now and then'; 'old and new'; 'tomorrow'; 'Dreamtime' or 'The Dreaming'
- dates and changes that have personal significance such as birthdays, traditions and rituals

WA1HAKUH2

Critical and creative thinking Personal and social capability Intercultural understanding

The differences and similarities between children's daily lives and life during their parents' and grandparents' childhoods and how daily lives have changed

For example:

- family traditions and leisure time
- changes to means of communication over time

WA1HAKUH3

Critical and creative thinking Personal and social capability Intercultural understanding

Humanities and Social Sciences skills

Questioning and researching

Reflect on current understanding of a topic

For example:

- brainstorm
- collaborative learning strategies
- sustained shared thinking

WA1HASKQ1

Literacy Critical and creative thinking

Pose and respond to reflective questions about objects, people, places and events in the past and present

For example:

- scaffold construction of questions

WA1HASKQ2

Literacy Critical and creative thinking

Locate information from a variety of provided sources

For example:

- electronic sources
- print sources such as books, photographs, graphics and plans
- other sources including people

WA1HASKQ3

Literacy Critical and creative thinking Digital literacy

Sort and record selected information and/or data

For example:

- use graphic organisers
- identify key words
- collaborative learning strategies

WA1HASKQ4

Literacy Numeracy Critical and creative thinking

Analysing

Process information and/or data collected

For example:

- sequence information or events
- categorise information
- combine information from different sources

WA1HASKA1

Literacy Numeracy Critical and creative thinking

Explore and discuss points of view

For example:

- recognise that stories can be told from different perspectives

WA1HASKA2

Literacy Critical and creative thinking Intercultural understanding

Evaluating

Draw conclusions based on information and/or data

For example:

- use an opinion to make a judgement
- form categories
- make generalisations based on patterns

WA1HASKE1

Literacy Critical and creative thinking Personal and social capability

Participate in decision-making processes

For example:

- engage in group discussions
- make shared decisions
- share views

WA1HASKE2

Literacy Critical and creative thinking Personal and social capability

Communicating and reflecting

Present findings in a range of communication forms, using relevant terms

For example:

- oral retell, role play, graphic organisers, digital, written

WA1HASKC1

Literacy Critical and creative thinking Digital literacy

Reflect on learning and respond to findings

For example:

- discuss what they have learnt and what they are still curious about
- discuss an appropriate response to findings
- apply learning contextually through play

WA1HASKC2

Literacy Critical and creative thinking Personal and social capability

Year 2

Year Level Description

In the early childhood phase of schooling, learning, development and wellbeing are connected and learning experiences are informed by the Principles and Practices of the Early Years Learning Framework. A holistic curriculum that integrates knowledge, understandings, skills, values and attitudes across learning areas connects learning to children's lives and their natural curiosity about their world.

Humanities and Social Sciences provides opportunities for children to make sense of their world through experimentation, exploration and play.

In Year 2, children have a natural curiosity about their physical, social and technological world. Children are provided with a holistic and integrated curriculum through which they are able to build, design, problem-solve, represent and reflect on new learning in ways that are meaningful to them. Children engage in a range of intentional learning experiences to investigate different ways of collecting information and/or data from sources such as observations, books, people and photos. They learn how narratives can be used to communicate and represent their changing understandings in multiple ways.

The concepts of place, space and interconnection are expanded through exploring the links with people and places. The ways that Aboriginal and Torres Strait Islander peoples maintain connections to Country/Place, and Australia's interconnections with Asia and the world, allow children to explore the hierarchy of geographical scale. They further develop a mental map of the world and of where they are located in relation to other places.

Children are given the opportunity to develop their historical understanding through the key concepts of continuity and change, cause and effect, perspectives, empathy and significance. These concepts are investigated within the context of exploring the history of their local area and why the past is important to the local community, and therefore worthy of preservation.

Achievement Standard

By the end of the year:

Children pose questions, locate, sort and record collected information and/or data from provided sources. They process relevant information and/or data by categorising, sequencing events and exploring points of view, and draw simple conclusions. They participate in decision-making processes by contributing to group discussions. Children share their findings in a range of

ways using some relevant terms. They reflect on what they have learnt using oral and/or written forms.

Children locate major geographical divisions of the world, and describe places at a variety of scales. They identify the factors that influence people's connections with others in different places, and describe the interconnections between people and places. Children identify people, sites and parts of the natural environment in their local community that reveal information about the past, and those that have significance today. They identify examples of how technology has changed and its impact on people's lives.

Content Descriptions

Knowledge and understanding

Geography

The location of the major geographical divisions of the world in relation to Australia

For example:

- continents and oceans

WA2HAKUG1

Numeracy

How people and places interconnect across Australia, Asia and the world

For example:

- personal connections and travel experiences across Australia and the world
- how special events or current natural phenomena influence connections

WA2HAKUG2

Critical and creative thinking **Intercultural understanding**

The ways in which Aboriginal and Torres Strait Islander peoples maintain connections to Country/Place, the names and meanings given to local features and places

For example:

- Aboriginal and Torres Strait Islander names and meanings of places and locations
- how names are given and who is responsible for allocating them

WA2HAKUG3

Critical and creative thinking **Intercultural understanding**

How places can be defined on a variety of geographical scales

For example:

- geographical scales such as personal, local, regional and national

WA2HAKUG4

Numeracy **Critical and creative thinking**

History

The history of a significant person, building, site or part of the natural environment in the local community and what it reveals about the past

For example:

- social, cultural or spiritual significance

WA2HAKUH1

Critical and creative thinking **Intercultural understanding**

The importance today of an historical site or place and why it has heritage significance and cultural values for present generations

For example:

- sites such as community buildings, landmarks, war memorials, rock paintings and engravings

WA2HAKUH2

Critical and creative thinking **Intercultural understanding**

The impact of changing technology on people’s lives and how the technology of the past differs from the technology used today

For example:

- use of technology in situations such as the home, at work, when travelling, for leisure activities and when playing and communicating

WA2HAKUH3

Critical and creative thinking **Personal and social capability** **Digital literacy**

Humanities and Social Sciences skills

Questioning and researching

Reflect on current understanding of a topic

For example:

- brainstorm
- collaborative learning strategies
- sustained shared thinking

WA2HASKQ1

Literacy Critical and creative thinking

Pose and respond to reflective questions about objects, people, places and events in the past and present

For example:

- scaffold construction of questions

WA2HASKQ2

Literacy Critical and creative thinking

Locate information from a variety of provided sources

For example:

- electronic sources
- print sources such as books, photographs, graphics and plans
- other sources including people

WA2HASKQ3

Literacy Critical and creative thinking Digital literacy

Sort and record selected information and/or data

For example:

- use graphic organisers
- identify key words
- collaborative learning strategies

WA2HASKQ4

Literacy Numeracy Critical and creative thinking

Analysing

Process information and/or data collected

For example:

- sequence information or events
- categorise information
- combine information from different sources

WA2HASKA1

Literacy Numeracy Critical and creative thinking

Explore and discuss points of view

For example:

- recognise that stories can be told from different perspectives

WA2HASKA2

Literacy Critical and creative thinking Intercultural understanding

Evaluating

Draw conclusions based on information and/or data

For example:

- use an opinion to make a judgement
- form categories
- make generalisations based on patterns

WA2HASKE1

Literacy Critical and creative thinking Personal and social capability

Participate in decision-making processes

For example:

- engage in group discussions
- make shared decisions
- share views

WA2HASKE2

Literacy Critical and creative thinking Personal and social capability

Communicating and reflecting

Present findings in a range of communication forms, using relevant terms

For example:

- oral retell, role play, graphic organisers, digital, written

WA2HASKC1

Literacy Critical and creative thinking Digital literacy

Reflect on learning and respond to findings

For example:

- discuss what they have learnt and what they are still curious about
- discuss an appropriate response to findings
- apply learning contextually through play

WA2HASKC2

Literacy Critical and creative thinking Personal and social capability

Year 3

Year Level Description

In the middle to late childhood phase of schooling, students develop a sense of self, their world expands, and they begin to see themselves as members of larger communities. Learning experiences emphasise and lead to an appreciation of both the commonality and diversity of human experience and concerns.

In Humanities and Social Sciences, students develop their social skills and ability to work collaboratively. The ability of students to draw on a wider range of sources of information is enhanced by introducing them to experiences beyond their immediate environment, including those of people from other times, places and cultures.

In Year 3, students develop their understanding and application of skills, including questioning and researching, analysing, evaluating, communicating and reflecting. They apply these skills to their daily learning experiences and to investigate events, developments, issues and phenomena, both historical and contemporary.

Students build on their understanding of civics and citizenship through the concepts of democracy and participation. Using familiar contexts, they consider how and why community groups create rules and make decisions. Students consider their own participation in the local community and how this contributes to society.

The concepts of place, space, environment and interconnection continue to be developed as a way of thinking. Students examine the similarities and differences between places, with the opportunity to inquire into the natural and human characteristics of places in various locations on the local, regional and national scale. The development of the students' mental map of the world is extended through a study of the location and characteristics of places in the Southern Hemisphere, including Australia and its near neighbours.

Students develop their historical understanding through the key concepts of sources, continuity and change, cause and effect, perspectives, empathy and significance. These concepts are investigated within the context of exploring the historical features and diversity of their community as represented in symbols and emblems of significance, and celebrations and commemorations, both locally and in other places around the world.

Achievement Standard

By the end of the year:

Students develop questions, locate and collect information and/or data from a variety of sources. They record their information and/or data in a range of formats and use some protocols when referring to the work of others. Students use given criteria to select relevant information, and they interpret information and/or data by sequencing events and identifying different points of view. Students use given decision-making processes to draw simple conclusions and provide explanations, based on information and/or data. They present findings using a range of communication forms appropriate to audience and purpose, using relevant terms, and reflect on these findings to propose an action.

Students identify the importance of rules and the democratic processes that groups follow when making decisions. They describe how people participate in community groups and identify the benefits to both the individual and the community.

Students map and locate various boundaries and natural features that define Australia. They describe the diverse characteristics of Australia's neighbouring countries, identify simple interconnections between people and places, and describe how people's perceptions of places are influenced.

Students describe an example of continuity and change over time in a given area. They identify the contribution of different cultural groups on a community. Students identify the ways people in Australia, and around the world, acknowledge days and events that have historical significance.

Content Descriptions

Knowledge and understanding

Civics and Citizenship

Who makes rules, why rules are important in the school and/or local community, and the consequences of rules not being followed

WA3HAKUC1

Critical and creative thinking Personal and social capability Ethical understanding

Why people participate in community groups, and how students can actively participate and contribute to their local community

For example:

- school or community projects

WA3HAKUC2

Critical and creative thinking Personal and social capability Ethical understanding

Geography

The location of Australian states, territories, capital cities and major regional centres of Western Australia

WA3HAKUG1

Literacy Numeracy

The location and identifying attributes of Australia's major natural features

For example:

- natural features such as rivers, deserts, mountains and rainforests

WA3HAKUG2

Literacy Numeracy

How language groups of Australia's Aboriginal and Torres Strait Islander peoples divide their Country/Place and how this compares to the surveyed boundaries of Australian states and territories

WA3HAKUG3

Intercultural understanding

The location of Australia's neighbouring countries and the similarities and differences in natural and human characteristics

For example:

- natural characteristics such as climate, animals and vegetation
- human characteristics such as language, family composition and built environment

WA3HAKUG4

Intercultural understanding

History

One important example of change and one important example of continuity over time in the local community, region or state/territory

For example:

- in relation to the areas of transport, work, education, natural and built environments, entertainment or daily life

WA3HAKUH1

Literacy

The role that different cultural groups have played in the development and character of the local community compared with development in another community

For example:

- commercial outlets such as restaurants and shops
- different religious buildings

WA3HAKUH2

Critical and creative thinking Personal and social capability Intercultural understanding

Significant events, symbols and emblems that are important to Australia's shared identity and diversity, and how they are celebrated, commemorated or recognised in Australia

For example:

- Australian commemorations and celebrations such as Anzac Day, Australia Day, NAIDOC Week, National Sorry Day
- international celebrations and commemorations such as religious and cultural festivals

WA3HAKUH3

Critical and creative thinking Intercultural understanding

Humanities and Social Sciences skills

Questioning and researching

Identify current understanding of a topic

For example:

- brainstorm
- KWL chart

WA3HASKQ1

Literacy Critical and creative thinking

Develop a range of focus questions to investigate

WA3HASKQ2

Literacy Critical and creative thinking

Locate and collect information from a variety of sources

For example:

- electronic sources such as television and websites
- print sources such as books, photographs, images and plans
- other sources including interviews, museums and library catalogues

WA3HASKQ3

Literacy Critical and creative thinking Digital literacy

Record selected information and/or data

For example:

- use graphic organisers
- use note-taking strategies

WA3HASKQ4

Literacy Numeracy Critical and creative thinking

Recognise the ethical protocols that exist when gathering information and/or data

For example:

- respect others' work

WA3HASKQ5

Literacy Personal and social capability Ethical understanding

Analysing

Use criteria for selecting relevant information

For example:

- accuracy
- reliability
- usefulness

WA3HASKA1

Literacy Critical and creative thinking

Interpret information and/or data collected

For example:

- sequence events in chronological order
- identify patterns and trends

WA3HASKA2

Literacy Numeracy Critical and creative thinking

Identify different points of view in information and/or data

For example:

- distinguish fact from opinion
- explore different stories on the same topic

WA3HASKA3

Literacy Critical and creative thinking Personal and social capability

Evaluating

Draw conclusions and give explanations, based on the information and/or data displayed in texts, tables, graphs and maps

For example:

- show similarities and differences

WA3HASKE1

Literacy Critical and creative thinking Personal and social capability

Use decision-making processes

For example:

- share views and recognise different points of view
- identify issues, possible solutions and plan for action in groups

WA3HASKE2

Literacy Critical and creative thinking Personal and social capability

Communicating and reflecting

Present findings and conclusions in a range of communication forms, appropriate to audience and purpose, using relevant terms

For example:

- written, oral, visual, digital, tabular, graphic

WA3HASKC1

Literacy Critical and creative thinking Digital literacy

Reflect on learning and act on findings in different ways

For example:

- complete a KWL chart
- propose an action in response to new knowledge

WA3HASKC2

Literacy Critical and creative thinking Personal and social capability

Year 4

Year Level Description

In the middle to late childhood phase of schooling, students develop a sense of self, their world expands, and they begin to see themselves as members of larger communities. Learning experiences emphasise and lead to an appreciation of both the commonality and diversity of human experience and concerns.

In Humanities and Social Sciences, students develop their social skills and ability to work collaboratively. The ability of students to draw on a wider range of sources of information is enhanced by introducing them to experiences beyond their immediate environment, including those of people from other times, places and cultures.

In Year 4, students develop their understanding and application of skills, including questioning and researching, analysing, evaluating, communicating and reflecting. They apply these skills to their daily learning experiences and to investigate events, developments, issues and phenomena, both historical and contemporary.

Students continue to build on their understanding of civics and citizenship through the concepts of democratic values, rights and responsibilities, and participation. They explore the purpose and services of local government and how these contribute to community life. The notions of belonging and personal identity are further developed to encompass laws, the importance of laws in society and cultural diversity.

The concepts of place, space, environment, interconnection and sustainability continue to be developed as a way of thinking. Students have the opportunity to inquire into how the environment supports the lives of people and all other living things; and that people have differing views on how sustainability can be achieved. The development of the students' mental map of the world is extended through a study of the location and characteristics of Africa and Europe.

Students develop their historical understanding through the key concepts of sources, continuity and change, cause and effect, perspectives, empathy and significance. These concepts are investigated within the context of exploring the history of Aboriginal and Torres Strait Islander peoples before the arrival of Europeans, and European exploration and colonisation up to the early 1800s. They explore interactions between groups and determine how these experiences contributed to cultural diversity.

Achievement Standard

By the end of the year:

Students develop questions, locate and collect information and/or data from a variety of sources. They record their information and/or data in a range of formats and use some protocols when referring to the work of others. Students use given criteria to select relevant information, and they interpret information and/or data by sequencing events and identifying different points of view. They use given decision-making processes to draw simple conclusions and provide explanations based on information and/or data. Students present findings using a range of communication forms appropriate to audience and purpose, using relevant terms. They reflect on findings to propose an action.

Students identify the role of local government in the community, and recognise that people's identity can be shaped through participation in a community group. They distinguish between rules and laws and identify that rights and responsibilities are important in maintaining social cohesion.

Students identify the location of Africa and Europe, and their major countries, in relation to Australia. They identify the main characteristics of their natural environments and describe the importance of the interconnections between people, plants and animals at the local to global scale. Students recognise that people have different views on the sustainable use of natural resources and describe how they can be managed and protected.

Students describe the connection that Aboriginal and Torres Strait Islander peoples have to Country/Place and identify the impact of contact on the First Nations peoples of Australia, and around the world, as a result of exploration and colonisation. They identify the significance of past events in bringing about change and describe the experiences of an individual or a group over time. Students explain how and why life changed in the past and identify aspects of the past that have remained the same.

Content Descriptions

Knowledge and understanding

Civics and Citizenship

The roles of local government and how members of the community use and contribute to local services

For example:

- leisure services such as libraries, pools and sporting facilities
- environmental services such as waste management and parks
- administrative services such as pet management and town planning

WA4HAKUC1

Personal and social capability **Ethical understanding**

The differences between rules and laws and why laws are important

WA4HAKUC2

Personal and social capability **Ethical understanding**

People belong to diverse groups, such as cultural, religious and/or social groups, and this can shape identity

WA4HAKUC3

Personal and social capability **Ethical understanding** **Intercultural understanding**

Geography

The main characteristics of the continents of Africa and Europe, and the location of their major countries in relation to Australia

For example:

- characteristics such as climate, natural vegetation, landforms and native animals

WA4HAKUG1

Numeracy **Critical and creative thinking**

The importance of environments to animals and people, and the different views on how they can be protected

For example:

- providing habitats for animals
- using land for agriculture
- national parks to protect flora and fauna

WA4HAKUG2

Critical and creative thinking **Personal and social capability**

Sustainable use and management of renewable and non-renewable resources

For example:

- the use of renewable and non-renewable resources in the classroom
- how Aboriginal and Torres Strait Islander peoples manage and sustainably use plants, animals and minerals

WA4HAKUG3

Critical and creative thinking **Personal and social capability** **Ethical understanding**

History

The diversity and longevity of Australia's first peoples and the ways they are connected to Country/Place and their pre-contact ways of life

WA4HAKUH1

Critical and creative thinking **Intercultural understanding**

Stories of the First Fleet, including reasons for the journey, who travelled to Australia, and their experiences following arrival

For example:

- treatment of convicts
- daily lives of the different people who travelled to Australia
- how social order was maintained

WA4HAKUH2

Critical and creative thinking Intercultural understanding

The nature of contact between Aboriginal and Torres Strait Islander peoples and others and the impact that these interactions and colonisation had on the environment and people's lives

For example:

- contact with the Macassans and Europeans
- impacts such as dispossession, dislocation, the loss of lives through contact, diseases, loss of food sources and medicines

WA4HAKUH3

Critical and creative thinking Intercultural understanding

The journey of one world navigator, explorer or trader up to the late 18th century, including their contacts and exchanges with societies in Africa, the Americas, Asia and Oceania

For example:

- Christopher Columbus
- Vasco da Gama
- Ferdinand Magellan
- James Cook

WA4HAKUH4

Numeracy Critical and creative thinking Intercultural understanding

Humanities and Social Sciences skills

Questioning and researching

Identify current understanding of a topic

For example:

- brainstorm
- KWL chart

WA4HASKQ1

Literacy Critical and creative thinking

Develop a range of focus questions to investigate

WA4HASKQ2

Literacy Critical and creative thinking

Locate and collect information from a variety of sources

For example:

- electronic sources such as television and websites
- print sources such as books, photographs, images and plans
- other sources including interviews, museums and library catalogues

WA4HASKQ3

Literacy Critical and creative thinking Digital literacy

Record selected information and/or data

For example:

- use graphic organisers
- use note-taking strategies

WA4HASKQ4

Literacy Numeracy Critical and creative thinking

Recognise the ethical protocols that exist when gathering information and/or data

For example:

- respect others' work

WA4HASKQ5

Literacy Personal and social capability Ethical understanding

Analysing

Use criteria for selecting relevant information

For example:

- accuracy
- reliability
- usefulness

WA4HASKA1

Literacy Critical and creative thinking

Interpret information and/or data collected

For example:

- sequence events in chronological order
- identify patterns and trends

WA4HASKA2

Literacy Numeracy Critical and creative thinking

Identify different points of view in information and/or data

For example:

- distinguish fact from opinion
- explore different stories on the same topic

WA4HASKA3

Literacy Critical and creative thinking Personal and social capability

Evaluating

Draw conclusions and give explanations, based on the information and/or data displayed in texts, tables, graphs and maps

For example:

- show similarities and differences

WA4HASKE1

Literacy Critical and creative thinking Personal and social capability

Use decision making processes

For example:

- share views and recognise different points of view
- identify issues, possible solutions and plan for action in groups

WA4HASKE2

Literacy Critical and creative thinking Personal and social capability

Communicating and reflecting

Present findings and conclusions in a range of communication forms, appropriate to audience and purpose, using relevant terms

For example:

- written, oral, visual, digital, tabular, graphic

WA4HASKC1

Literacy Critical and creative thinking Digital literacy

Reflect on learning and act on findings in different ways

For example:

- complete a KWL chart
- propose an action in response to new knowledge

WA4HASKC2

Literacy Critical and creative thinking Personal and social capability

Year 5

Year Level Description

In the middle to late childhood phase of schooling, students develop a sense of self, their world expands, and they begin to see themselves as members of larger communities. Learning experiences emphasise and lead to an appreciation of both the commonality and diversity of human experience and concerns.

In Humanities and Social Sciences, students begin to understand and appreciate different points of view, develop the ability to think in more abstract terms and undertake sustained activities for longer periods of time. The investigation of their world becomes more refined and includes relationships, structures, systems and processes. Students' ability to draw on a wider range of sources of information is enhanced by introducing them to experiences beyond their immediate environment, including those of people from other times, places and cultures.

In Year 5, students further develop their understanding and application of skills, including questioning and researching, analysing, evaluating, communicating and reflecting. They apply these skills to their daily learning experiences and to investigate events, developments, issues and phenomena, both historical and contemporary.

Students continue to build on their understanding of the concepts of democratic values, justice and rights and responsibilities

as they further develop their understanding of laws, including how they affect the lives of citizens. Students are introduced to the concept of the Westminster system as they explore the key features of Australia's electoral process.

The importance of informed consumer decision-making is introduced through the concept of making choices. Students focus on the factors that impact upon the allocation of resources, and this is underpinned by the concept of scarcity. They relate this to a personal or community context, questioning what influences their own decision-making.

The concepts of place, space, environment, interconnection, sustainability and change continue to be developed as a way of thinking. Students have the opportunity to inquire into the connections between people and the environment, and how these interactions influence one another. The development of the students' mental map of the world is extended through a study of the location and characteristics of North America and South America.

Students develop their historical understanding through the key concepts of sources, continuity and change, cause and effect, perspectives, empathy and significance. These concepts are investigated within the historical context of colonial Australia in the 1800s and the significant events and people who shaped the political and social structures at that time are considered.

Achievement Standard

By the end of the year:

Students develop questions for a specific purpose. They locate and collect relevant information and/or data from primary and/or secondary sources, using appropriate methods to organise and record information. Students apply ethical protocols when collecting information. They use criteria to determine the relevance of information and/or data. Students interpret information and/or data, sequence information about events, identify different perspectives, and describe cause and effect. They draw conclusions from evidence in information and/or data. Students engage in a range of processes when making decisions in drawing conclusions. They consider audience and purpose when selecting appropriate communication forms, including some subject-specific terminology and concepts. Students reflect on findings to refine their learning.

Students identify the key features of Australia's democracy, describe the electoral process, and explain the significance of laws. They describe how participation in groups can benefit the community.

Students identify the imbalance between wants and resources, and the impact of scarcity on resource allocation.

Students identify the location of North America and South America and their major countries, in relation to Australia. They describe the characteristics of places, and the interconnections between places, people and environments. Students identify the impact of these interconnections and how people manage and respond to a geographical challenge.

Students identify the cause and effect of change on Australia's colonies, and describe aspects of the past that have remained the same. They describe the different experiences of people in the past. Students recognise the significance of a group, individual, event or development in bringing about change in the Swan River Colony.

Content Descriptions

Knowledge and understanding

Civics and Citizenship

The key values and features of Australia’s democracy and the electoral process

For example:

- features such as compulsory voting, secret ballot and preferential voting
- values such as freedom, equality, fairness and justice

WA5HAKUC1

Personal and social capability **Ethical understanding**

The roles and responsibilities of electors and representatives

For example:

- enrolling to vote and being informed
- representing the electorate's interest and participating in the parliamentary process

WA5HAKUC2

Personal and social capability **Ethical understanding**

How regulations and laws affect the lives of citizens

For example:

- the different types of laws
- how laws protect human rights

WA5HAKUC3

Critical and creative thinking **Personal and social capability** **Ethical understanding**

How citizens with shared beliefs and values work together to achieve a civic goal

WA5HAKUC4

Critical and creative thinking **Personal and social capability** **Ethical understanding**

Economics and Business

The difference between needs and wants, and how they may differ between individuals

WA5HAKUE1

Critical and creative thinking Ethical understanding

Resources can be natural, human, or capital, and how these are used sustainably to make goods and services to satisfy the needs and wants of present and future generations

For example:

- natural resources such as solar and water
- human resources such as workers and business owners
- capital resources such as machinery, tools and technologies

WA5HAKUE2

Critical and creative thinking Ethical understanding

Due to scarcity, choices need to be made about the use of limited resources and how the alternative use of resources result in the need to consider trade-offs

For example:

- using school land to plant a garden bed or install additional playground equipment
- committing to organised sport or having more free time

WA5HAKUE3

Critical and creative thinking Ethical understanding

Geography

The main characteristics of the continents of South America and North America, and the location of their major countries in relation to Australia

For example:

- characteristics such as climate, natural vegetation, landforms and native animals

WA5HAKUG1

Numeracy Critical and creative thinking Intercultural understanding

The way people alter the environmental characteristics of Australian places

For example:

- land cover clearing for farming and urban development
- introduction of boundaries through the establishment of fences, drainage or irrigation infrastructure
- land use such as plantations and mining

WA5HAKUG2

Critical and creative thinking Intercultural understanding

The impact of bushfires, droughts, cyclones, floods or other weather events on environments and communities, and how people can respond

WA5HAKUG3

Critical and creative thinking Personal and social capability

History

The economic, political and social reasons for establishing British colonies in Australia after 1800

For example:

- economic reasons such as the availability of natural resources and the establishment of penal colonies
- political reasons such as its strategic position in the Asia--Pacific region and the expansion of the British Empire
- social reasons such as population pressures in Britain

WA5HAKUH1

Critical and creative thinking

The patterns of colonial development and settlement and how this impacted upon the environment and the daily lives of the different inhabitants

For example:

- geographical features, climate, water resources, transport, discovery of gold that shaped patterns
- introduced species
- lives of Aboriginal and Torres Strait Islander peoples, convicts and free settlers

WA5HAKUH2

Critical and creative thinking Intercultural understanding

The contribution or significance of one individual or group in shaping the Swan River Colony, including their motivations and actions

For example:

- Aboriginal and Torres Strait Islander peoples' resistance fighters such as Yagan and Fanny Balbuk

- groups such as explorers, farmers, pastoralists and convicts
- colonialists such as James Stirling and Thomas Peel

WA5HAKUH3

Critical and creative thinking Intercultural understanding

Humanities and Social Sciences skills

Questioning and researching

Identify current understandings, consider possible misconceptions and identify personal views on a topic

For example:

- KWL chart
- concept map

WA5HASKQ1

Literacy Critical and creative thinking

Develop and refine a range of questions required to plan an inquiry

WA5HASKQ2

Literacy Critical and creative thinking

Locate and collect information and/or data from a range of appropriate primary sources and secondary sources

For example:

- different media, including print, television and internet
- primary sources such as photographs, interviews and historical artefacts
- secondary sources including documentaries and written texts

WA5HASKQ3

Literacy Critical and creative thinking Digital literacy

Record selected information and/or data using a variety of methods

For example:

- use graphic organisers
- paraphrase
- summarise

WA5HASKQ4

Literacy Numeracy Digital literacy

Use ethical protocols when gathering information and/or data

For example:

- acknowledge the work of others
- reference work
- obtain permission to use photographs and interviews

WA5HASKQ5

Literacy Personal and social capability Ethical understanding

Analysing

Develop and use criteria to determine the relevancy of information

For example:

- consider accuracy, reliability and publication date
- usefulness to the question

WA5HASKA1

Literacy Critical and creative thinking

Analyse information and/or data collected

For example:

- identify cause and effect
- make connections with prior knowledge

WA5HASKA2

Literacy Numeracy Critical and creative thinking

Identify different perspectives in information and/or data

For example:

- analyse language
- identify motives

WA5HASKA3

Literacy Critical and creative thinking Personal and social capability

Evaluating

Draw and justify conclusions, and give explanations, based on the information and/or data displayed in texts, tables, graphs and maps

WA5HASKE1

Literacy Numeracy Critical and creative thinking

Use decision making processes including the use of criteria to assess the possible effects

For example:

- share opinions and personal perspectives, and consider different points of view
- identify issues, develop possible solutions, plan for action and identify advantages and disadvantages of different options

WA5HASKE2

Literacy Critical and creative thinking Personal and social capability

Communicating and reflecting

Present findings, conclusions and/or arguments, appropriate to audience and purpose, in a range of communication forms and using subject-specific terminology and concepts

For example:

- written, oral, visual, digital, tabular, graphic, maps

WA5HASKC1

Literacy Critical and creative thinking Digital literacy

Reflect on learning, identify new understandings and act on findings in different ways

For example:

- suggest additional questions to be investigated
- propose a course of action on an issue

WA5HASKC2

Literacy Critical and creative thinking Personal and social capability

Year 6

Year Level Description

In the middle to late childhood phase of schooling, students develop a sense of self, their world expands, and they begin to see themselves as members of larger communities. Learning experiences emphasise and lead to an appreciation of both the commonality and diversity of human experience and concerns.

In Humanities and Social Sciences, students begin to understand and appreciate different points of view, develop the ability to think in more abstract terms and undertake sustained activities for longer periods of time. The investigation of their world becomes more refined and includes relationships, structures, systems and processes. Students' ability to draw on a wider range of sources of information is enhanced by introducing them to experiences beyond their immediate environment, including those of people from other times, places and cultures.

In Year 6, students further develop their understanding and application of skills, including questioning and researching, analysing, evaluating, communicating and reflecting. They apply these skills to their daily learning experiences and to investigate events, developments, issues and phenomena, both historical and contemporary.

Students continue building on their understanding of the concepts of justice, rights and responsibilities, and the Westminster system. They investigate Australia's democratic system of government, including state/territory and federal parliaments, and the court system.

Students further develop their understanding of economics and business concepts, such as scarcity and making choices, as they explore the ways resources are allocated to meet needs and wants in their community. They consider the effect of consumer and financial decisions on individuals, the community and the environment. Students focus on community or regional issues, with opportunities for concepts to also be considered in national or global contexts where appropriate.

The concepts of place, space, environment, interconnection, sustainability and change continue to be developed as a way of thinking. Students inquire into the factors that shape the diverse characteristics of different places and how people, places and environments are interconnected, including a study of the world's cultural, economic, demographic and social diversity. The development of the students' mental map of the world is extended through a study of the location of countries in the Asia region.

Students develop their historical understanding through the key concepts of sources, continuity and change, cause and effect, perspectives, empathy and significance. These concepts are investigated within the historical context of the development of Australia as a nation, particularly after 1900; the factors that led to Federation; and how Australian society changed throughout the 20th century.

Achievement Standard

By the end of the year:

Students develop questions for a specific purpose. They locate and collect relevant information and/or data from primary and/or secondary sources, using appropriate methods to organise and record information. Students apply ethical protocols when collecting information. They use criteria to determine the relevance of information and/or data. Students interpret information and/or data, sequence information about events, identify different perspectives, and describe cause and effect. Students engage in a range of processes when making decisions in drawing conclusions. They consider audience and purpose when selecting appropriate communication forms, including some subject-specific terminology and concepts. They reflect on findings to refine their learning.

Students recognise that Australia's democracy is based on the Westminster system, and describe the roles and responsibilities of each level of government and how laws are made.

Students identify the different ways businesses organise the provision of goods and services. They identify the factors that influence consumer decisions when making choices, and the consequences of those choices for businesses and the consumer.

Students identify the location of Asia and its major countries, in relation to Australia. They recognise the geographical and cultural diversity of places, by describing the physical and human characteristics of specific places, at the local to global scale. Students identify that people, places and environments are interconnected and describe how these interconnections lead to change.

Students explain the significance of an individual, group or event on the Federation of Australia, and identify ideas and/or influences of other systems on the development of Australia as a nation. They describe continuity and change in relation to Australia's democracy and citizenship. Students compare experiences of migration and describe the cause and effect of change on society.

Content Descriptions

Knowledge and understanding

Civics and Citizenship

The key institutions of Australia's democratic system of government based on the Westminster system, including the monarchy, parliaments and courts

WA6HAKUC1

Personal and social capability **Ethical understanding**

The roles and responsibilities of the three levels of government

For example:

- federal government is responsible for defence, postal service and immigration
- state government is responsible for education and health
- local government is responsible for parks, verges and rubbish collection

WA6HAKUC2

Critical and creative thinking **Ethical understanding**

How laws are initiated and passed through the federal parliament

WA6HAKUC3

Personal and social capability **Ethical understanding**

Economics and Business

The impact consumer purchasing decisions can have on a family, the broader community and the environment

For example:

- where money goes when buying from local businesses compared to large multinational companies
- the environmental consequences of purchasing goods with excessive plastic packaging

WA6HAKUE1

Personal and social capability **Ethical understanding**

Businesses provide goods and services in different ways to earn revenue

For example:

- variety of scale and physical locations such as shopping centres, local markets, online stores, small independent stores and remote community stores

WA6HAKUE2

Critical and creative thinking

Influences on consumer choices and strategies that can be used to help make informed personal consumer and financial choices

For example:

- influences such as available money, advertising, peer pressures, price of goods and services, cultural or personal belief

systems
• strategies such as comparing prices and keeping financial records

WA6HAKUE3

Numeracy Ethical understanding

Geography

The location of the major countries of the Asia region in relation to Australia and the geographical diversity within the region

For example:

• economic characteristics such as per capita income or energy consumption
• demographic characteristics such as population size and distribution
• social characteristics such as education and life expectancy

WA6HAKUG1

Intercultural understanding

The world's cultural diversity, including that of its First Nations peoples who live in different regions in the world

For example:

• the Māori of Aotearoa/New Zealand
• the Orang Asli of Malaysia and Indonesia

WA6HAKUG2

Personal and social capability Intercultural understanding

Australia's connection with countries and how these connections change people and places

For example:

• short-term connections such as tourism, foreign aid and sport
• long-term connections such as trade, migration, education and defence

WA6HAKUG3

Critical and creative thinking Intercultural understanding

History

Key figures, ideas and events that led to Australia's Federation and Constitution, including British and American influences on Australia's system of law and government

For example:

• Henry Parkes, Edmund Barton, George Reid and John Quick
• the Tenterfield Oration, Corowa Conference, and the referendums
• the Magna Carta, federalism, constitutional monarchy, the Westminster system and the Houses of Parliament

WA6HAKUH1

Critical and creative thinking

Changes in Australia's political system and to Australian citizenship after Federation and throughout the 20th century that impacted Aboriginal and Torres Strait Islander peoples, migrants, women and children

For example:

• right to vote
• Aborigines Act 1905 (Western Australia)
• women's suffrage at the end of the 19th/start of the 20th century

WA6HAKUH2

Ethical understanding Intercultural understanding

Stories of groups of people who migrated to Australia, including from one Asian country, the reasons they migrated and their contributions to society

For example:

• push factors such as war and conflict, economic hardship and political unrest
• pull factors such as gold rushes, employment opportunities and government-funded land settlement and assisted passage schemes

WA6HAKUH3

Critical and creative thinking

Humanities and Social Sciences skills

Questioning and researching

Identify current understandings, consider possible misconceptions and identify personal views on a topic

For example:

• KWL chart

- concept map

WA6HASKQ1

Literacy Critical and creative thinking

Develop and refine a range of questions required to plan an inquiry

WA6HASKQ2

Literacy Critical and creative thinking

Locate and collect information and/or data from a range of appropriate primary sources and secondary sources

For example:

- different media, including print, television and internet
- primary sources such as photographs, interviews and historical artefacts
- secondary sources including documentaries and written texts

WA6HASKQ3

Literacy Critical and creative thinking Digital literacy

Record selected information and/or data using a variety of methods

For example:

- use graphic organisers
- paraphrase
- summarise

WA6HASKQ4

Literacy Numeracy Digital literacy

Use ethical protocols when gathering information and/or data

For example:

- acknowledge the work of others
- reference work
- obtain permission to use photographs and interviews

WA6HASKQ5

Literacy Personal and social capability Ethical understanding

Analysing

Develop and use criteria to determine the relevancy of information

For example:

- consider accuracy, reliability and publication date
- usefulness to the question

WA6HASKA1

Literacy Critical and creative thinking

Analyse information and/or data collected

For example:

- identify cause and effect
- make connections with prior knowledge

WA6HASKA2

Literacy Numeracy Critical and creative thinking

Identify different perspectives in information and/or data

For example:

- analyse language
- identify motives

WA6HASKA3

Literacy Critical and creative thinking Personal and social capability

Evaluating

Draw and justify conclusions, and give explanations, based on the information and/or data displayed in texts, tables, graphs and maps

For example:

- identify patterns
- infer relationships

WA6HASKE1

Literacy Numeracy Critical and creative thinking

Use decision-making processes including the use of criteria to assess the possible effects

For example:

- share opinions and personal perspectives, and consider different points of view
- identify issues, develop possible solutions, plan for action, identify advantages and disadvantages of different options

WA6HASKE2

Literacy Critical and creative thinking Personal and social capability

Communicating and reflecting

Present findings, conclusions and/or arguments, appropriate to audience and purpose, in a range of communication forms and using subject-specific terminology and concepts

For example:

- written, oral, visual, digital, tabular, graphic, maps

WA6HASKC1

Literacy Critical and creative thinking Digital literacy

Reflect on learning, identify new understandings and act on findings in different ways

For example:

- suggest additional questions to be investigated
- propose a course of action on an issue

WA6HASKC2

Literacy Critical and creative thinking Personal and social capability

Year 7

Year Level Description

In the early adolescence phase of schooling, students align with their peer group and begin to question established conventions, practices and values. Learning and teaching programs assist students to develop a broader and more comprehensive understanding of the contexts of their lives and the world in which they live.

In Humanities and Social Sciences, students assume increased responsibility and engage in important decision making within the class and school to support their growing independence and collaborative skills. Exploration of alternative ideas, perspectives and world views allows students to see themselves as active participants in their own continuing development and that of their society.

In Year 7, students develop increasing independence in critical thinking and skill application, which includes questioning, researching, analysing, evaluating, communicating and reflecting. They apply these skills to investigate events, developments, issues, and phenomena, both historical and contemporary.

Students continue to build on their understanding of the concepts of the Westminster system and democracy by examining the key features of Australia's democracy, and how it is shaped through the Australian Constitution and constitutional change. The concepts of justice, rights and responsibilities are further developed through a focus on Australia's legal system.

An understanding of the concepts of making choices and allocation is further developed through a focus on the interdependence of consumers and producers in the market, and the characteristics of successful businesses, including how innovation and entrepreneurial behaviour contribute to business success.

The concepts of place, space, environment, interconnection, sustainability and change continue to be developed as a way of thinking and enable students to inquire into the nature of water as a natural resource. The concept of place is expanded through students' investigation of the liveability of their own locality. They apply this understanding to a wide range of places and environments on the full range of scales, from local to global, and in a range of locations.

Students develop their historical understanding through key concepts, including evidence, continuity and change, cause and effect, perspectives, empathy, significance and contestability. These concepts are investigated within the historical context of how we know about the Deep Time History of Australia and the world's oldest continuous cultures, and the development of ancient societies.

Achievement Standard

By the end of the year:

Students construct a range of questions and use a variety of methods to select, collect and organise information and/or data from appropriate sources. They develop criteria to determine the usefulness of primary and/or secondary sources for a purpose. When interpreting sources, students identify their origin and purpose, and distinguish between fact and opinion. They interpret information and/or data to identify points of view/perspectives, relationships and/or trends, and to sequence events and developments. Students apply subject-specific skills to translate information and/or data from one format to another, in both familiar and unfamiliar situations. They draw simple evidence-based conclusions in a range of contexts. Students represent information and/or data in appropriate formats to suit audience and purpose. They develop texts using appropriate subject-specific terminology and concepts. Students use evidence to support findings and acknowledge sources of information.

Students describe how democracy in Australia is shaped by the Commonwealth Constitution. They describe the operation of

Australia's federal structure of government and the role of parliament, within the Westminster system. Students identify rights and responsibilities of being a participant in the legal system and describe how the legal system aims to provide justice.

Students describe how the price of goods and services results from interdependence between consumers and businesses, as a consequence of making choices. They describe how innovation and entrepreneurial behaviour provide benefits to individuals and the wider community.

Students describe the changes caused by interconnections between people, places and natural environments, and the alternative strategies used to manage the changes. They describe the features of liveable places, and how and/or why places are perceived and valued differently.

Students describe the ways that history can be examined, through archaeological, historical, and cultural evidence. They identify past events and developments that have been interpreted in different ways, and suggest reasons for change and continuity over time.

Content Descriptions

Knowledge and understanding

Civics and Citizenship

Australian ConstitutionThe purpose and value of the Australian Constitution

For example:

- to establish Australia as a nation made up of a Federation of states
- to serve as the legal framework for Australia

WA7HAKUC1

Critical and creative thinking **Personal and social capability** **Ethical understanding**

The three branches of government including the legislature, the executive and the judiciary

WA7HAKUC2

Personal and social capability **Ethical understanding**

The different roles of the House of Representatives and the Senate in Australia's bicameral parliament

For example:

- make and amend laws
- represent different groups within society
- scrutinise the work of government

WA7HAKUC3

Personal and social capability **Ethical understanding**

The process for constitutional change through a referendum and examples of attempts to change the Australian Constitution by referendum

For example:

- the concept of the double majority
- successful votes on the Constitution Alteration (Aboriginals) 1967
- unsuccessful votes on the Constitution Alteration (Establishment of a Republic) 1999

WA7HAKUC4

Critical and creative thinking **Personal and social capability** **Ethical understanding**

Australia's legal system
How Australia's legal system aims to provide justice, including through the rule of law, presumption of innocence, burden of proof and right to a fair trial

WA7HAKUC5

Critical and creative thinking **Personal and social capability** **Ethical understanding**

The role of courts, judges, lawyers and court officials in trials

WA7HAKUC6

Critical and creative thinking **Personal and social capability** **Ethical understanding**

How citizens participate in providing justice through their roles as witnesses and jurors

WA7HAKUC7

Critical and creative thinking **Personal and social capability** **Ethical understanding**

Economics and Business

Consumers and businesses
Why opportunity cost exists when decisions are made to allocate limited resources to meet unlimited needs and wants

WA7HAKUE1

Numeracy **Ethical understanding**

The interdependence between households and businesses using the two-sector circular flow model

WA7HAKUE2

Numeracy **Critical and creative thinking**

How businesses respond to the changing tastes and preferences of consumers

For example:

- lifestyle and alternative options
- environmentally friendly products and packaging

WA7HAKUE3

Critical and creative thinking **Ethical understanding**

How businesses set prices for a product and how they might adjust the price according to changes in demand

For example:

- different pricing strategies such as cost-plus pricing, discount pricing and competitor pricing
- pricing changes based on changing technology and seasonal factors

WA7HAKUE4

Numeracy **Critical and creative thinking**

Innovation and enterprise
Different types of business ownership

For example:

- sole trader, partnership, corporation and franchise

WA7HAKUE5

The concept of innovation and the ways businesses identify and respond to business opportunities

For example:

- how businesses identify needs, niches and gaps in markets and develop products or services to address opportunities, such as solar power and electric cars
- how technology has been used to improve efficiency in existing businesses, such as rideshare, food delivery services and online retail

WA7HAKUE6

Critical and creative thinking **Ethical understanding**

The characteristics of entrepreneurs, including the behaviours and skills they bring to their businesses

For example:

- risk taking, such as identifying and taking advantage of an opportunity
- demonstrating initiative, problem-solving, leadership, teamwork and communication
- entrepreneurs such as Melanie Perkins, Janine Allis and Richard Branson

WA7HAKUE7

Personal and social capability **Ethical understanding**

Geography

Water in Australia
The classification of environmental resources as renewable or non-renewable

WA7HAKUG1

Numeracy **Critical and creative thinking**

The location, distribution and variability of Australia's water resources

For example:

- the variability of seasons and longer-term climatic variations
- types of water stores such as aquifer, river basins, dams and springs

WA7HAKUG2

Numeracy **Critical and creative thinking**

Water scarcity and what causes it; why it is a problem; and ways of overcoming water scarcity

For example:

- physical factors such as drought and economic factors such as the way in which water is used as a resource
- the ways to overcome water scarcity through recycling wastewater, stormwater harvesting and reuse and desalination
- ways to reduce demand for water through water restrictions and public awareness campaigns

WA7HAKUG3

Numeracy **Critical and creative thinking** **Ethical understanding**

Place and liveability
The factors that influence the decisions people make about where to live and their perceptions of the liveability of places

For example:

- demographics such as age, education, income and cultural background
- cultural and historical links to the land by Aboriginal and Torres Strait Islander peoples

WA7HAKUG4

Critical and creative thinking

The influence of accessibility to services and facilities on the liveability of places

For example:

- services such as education and healthcare
- infrastructure allowing access to clean water and sanitation
- ways to access services and facilities such as the ability to walk or use public transport

WA7HAKUG5

Critical and creative thinking Ethical understanding

The influence of environmental quality on the liveability of places

For example:

- air and water quality
- proximity to oceans, rivers and open spaces

WA7HAKUG6

Numeracy Critical and creative thinking

The strategies used to enhance the liveability of places for different groups in society

For example:

- global shift in urban development that incorporates green space for residents
- providing accessible parking, ramps and signs in braille for people living with a disability
- improving access to the National Broadband Network for people living in rural areas to allow for use of services such as healthcare and banking

WA7HAKUG7

Critical and creative thinking Personal and social capability Ethical understanding

History

Deep Time History of Australia
Major time periods in history, including Deep Time History of Australia

For example:

- the chronology and difference in scale between Deep Time History of Australia, ancient, medieval and modern historical time periods
- the influence of culture on people's perceptions of time such as time as a linear or cyclical concept

WA7HAKUH1

Numeracy Intercultural understanding

How Aboriginal and Torres Strait Islander peoples are the world's oldest continuing cultures, displaying evidence of both continuity and change over Deep Time

For example:

- the archaeological, historical and cultural methods used to interpret tangible evidence such as artefacts and intangible evidence such as oral traditions
- the relationship between travel routes shared through Songlines and modern transport networks such as the routes across the Nullarbor Plain
- changing styles of art such as painting, carving, weaving and dance, over time

WA7HAKUH2

Critical and creative thinking Intercultural understanding

The development of early innovative technologies by Aboriginal and Torres Strait Islander peoples and how they were developed in different places

For example:

- astronomy and the use of stars to navigate such as the Seven Sisters Songline
- hunting tools and weapons such as boomerangs and woomeras
- engineered fish traps and weirs such as the Oyster Harbour Fish Traps by the Menang people in Kinjarling/Albany

WA7HAKUH3

Critical and creative thinking Intercultural understanding

The importance of conserving cultural heritage in collaboration with Aboriginal and Torres Strait Islander peoples

For example:

- cultural heritage such as significant sites, human remains, artefacts, rock art, physical structures, cultural knowledge and oral traditions
- archaeological evidence from Mungo Man and Mungo Lady which provides information about ritual burial and environmental conditions 40 000 years ago

WA7HAKUH4

Critical and creative thinking Ethical understanding Intercultural understanding

The ancient world (Egypt, Greece, Rome, India or China)
Time frame and location of the ancient civilisation

WA7HAKUH5

Numeracy Intercultural understanding

How the physical environment influenced the development of the ancient society

For example:

- the importance of rivers and other bodies of water for transport and trade
- the influence of topography such as the use of hills for defence and flood plains for food production

WA7HAKUH6

Critical and creative thinking Intercultural understanding

The significant beliefs, values and practices of the ancient society in at least one of the following areas: everyday life, warfare, religion, death and funerary customs

For example:

- the importance of tomb building
- the development of weaponry and armour
- the experiences of women and children

WA7HAKUH7

Critical and creative thinking Ethical understanding Intercultural understanding

The role of a significant individual in the ancient society's history

For example:

- Ramses II and Akhenaten in Egypt
- Emperor Qin Shi Huang Di and Confucius in China
- Julius Caesar and Agrippina the Younger in Rome
- Ashoka and Chandragupta Mauyra in India
- Pericles and Alexander the Great in Greece

WA7HAKUH8

Critical and creative thinking

Humanities and Social Sciences skills

Questioning and researching

Identify current understandings to consider possible gaps and/or misconceptions, new knowledge needed and challenges to personal perspectives

WA7HASKQ1

Literacy Critical and creative thinking

Construct a range of questions, propositions and/or hypotheses

WA7HASKQ2

Literacy Critical and creative thinking

Use a variety of methods to collect relevant information and/or data from a range of appropriate sources, such as print, digital, audio, visual and fieldwork

WA7HASKQ3

Literacy Numeracy Digital literacy

Select the best method for recording selected information and/or data

For example:

- graphic organisers, such as structured overviews for classifying or mind maps, for identifying relationships and overviews
- fieldwork, such as sketch drawings, a list of observable features and photographs

WA7HASKQ4

Literacy Numeracy Digital literacy

Identify differences in terms of origin and purpose between primary sources and secondary sources

For example:

- primary sources such as cartoons, speeches and artefacts
- secondary sources such as reference books, websites and documentaries

WA7HASKQ5

Literacy Critical and creative thinking

Use appropriate ethical protocols to plan and conduct an inquiry

For example:

- seek permission to use personal photos
- seek permission when planning a visit to Aboriginal cultural land
- use specific formats for acknowledging other people's information

WA7HASKQ6

Personal and social capability Ethical understanding Intercultural understanding

Analysing

Use criteria to select relevant information and/or data such as accuracy, reliability, currency and usefulness to the question

WA7HASKA1

Literacy Critical and creative thinking

Interpret information and/or data to identify key relationships and/or trends displayed in various formats

For example:

- change over time in a series of images
- identify spatial distributions from a map

WA7HASKA2

Literacy Numeracy Critical and creative thinking

Identify points of view and perspectives, attitudes and/or values in information and/or data

For example:

- from tables, statistics, graphs, models, cartoons, maps or timelines

WA7HASKA3

Literacy Numeracy Critical and creative thinking

Translate information and/or data from one format to another

For example:

- from a table to a graph

WA7HASKA4

Literacy Numeracy Critical and creative thinking

Apply subject-specific skills and concepts in familiar and new situations

WA7HASKA5

Literacy Critical and creative thinking

Evaluating

Draw evidence-based conclusions by evaluating information and/or data to generate a range of alternatives and plan for action in response to contemporary events, challenges, developments, issues, problems and/or phenomena; make comparisons; evaluate costs (disadvantages) and benefits (advantages); and infer relationships

WA7HASKE1

Literacy Numeracy Critical and creative thinking

Communicating and reflecting

Represent information and/or data using appropriate formats to suit audience and purpose

For example:

- tables/graphs, visual displays, models, timelines, maps, other graphic organisers

WA7HASKC1

Literacy Numeracy Digital literacy

Develop texts, particularly descriptions and explanations, using appropriate subject-specific terminology and concepts that use evidence to support findings, conclusions and/or arguments, from a range of sources

WA7HASKC2

Literacy Critical and creative thinking

Reflect on learning to review original understandings and/or determine actions in response to events, challenges, developments, issues, problems and/or phenomena

WA7HASKC3

Critical and creative thinking

Year 8

Year Level Description

In the early adolescence phase of schooling, students align with their peer group and begin to question established conventions, practices and values. Learning and teaching programs assist students to develop a broader and more comprehensive understanding of the contexts of their lives and the world in which they live.

In Humanities and Social Sciences, students assume increased responsibility and engage in important decision-making within the class and school to support their growing independence and collaborative skills. Exploration of alternative ideas, perspectives and world views allows students to see themselves as active participants in their own continuing development and that of their society.

In Year 8, students develop increasing independence in critical thinking and skill application, which includes questioning, researching, analysing, evaluating, communicating and reflecting. They apply these skills to investigate events, developments, issues, and phenomena, both historical and contemporary.

Students continue to build on their understanding of the concepts of the Westminster system, democracy and participation. They investigate the types of law in Australia and how they are made. They consider the responsibilities and freedoms of citizens, and how Australians can actively participate in their democracy, including the election process.

The concept of markets is introduced to further develop students' understanding of the concepts of interdependence, making choices and allocation. They consider how markets work and the rights, responsibilities and opportunities that arise for businesses, consumers and governments. Students consider the influences on the way people work and explore the factors that influence people's financial decision-making.

The concepts of place, space, environment, interconnection, sustainability and change continue to be developed as a way of thinking and provide students with the opportunity to inquire into the significance of landscapes to people and the spatial change in the distribution of populations. They apply this understanding to a wide range of places and environments at the full range of scales, from local to global, and in a range of locations.

Students develop their historical understanding through key concepts, including evidence, continuity and change, cause and effect, perspectives, empathy, significance and contestability. These concepts are investigated within the historical context of the medieval period into the modern period. They consider how societies changed, what key beliefs and values emerged, and the causes and effects of conflict, revolution and technological advancement.

Achievement Standard

By the end of the year:

Students construct a range of questions and use a variety of methods to select, collect and organise information and/or data from appropriate sources. They develop criteria to determine the usefulness of primary and/or secondary sources for a purpose. When interpreting sources, students identify their origin and purpose, and distinguish between fact and opinion. They interpret information and/or data to identify points of view/perspectives, relationships and/or trends, and to sequence events and developments. Students apply subject-specific skills to translate information and/or data from one format to another, in both familiar and unfamiliar situations. They draw simple evidence-based conclusions in a range of contexts. Students represent information and/or data in appropriate formats to suit audience and purpose. They develop texts using appropriate subject-specific terminology and concepts. Students use evidence to support findings and acknowledge sources of information.

Students explain the types of laws and how laws are made within the Westminster system. They apply aspects of democracy, describe the rights and responsibilities of participants in the process, and explain the freedoms that underpin Australia's democratic values.

Students explain how markets allocate resources in Australia and describe the interdependence of consumers, businesses and the government as a result of their involvement in the market. They identify how consumers and businesses influence and respond to each other in the market. They identify how individuals earn an income, and methods used to achieve financial goals.

Students describe different landforms and landscapes, and explain how places are perceived and valued differently. They consider the environmental and human characteristics of places to compare strategies for responding to a geomorphic challenge that takes into account environmental, economic and social factors. Students describe the interconnections within environments, and between people and places, to explain the movement of people at a local, national and global scale.

Students explain the feudal system in Medieval Europe and describe patterns of change and continuity over the time period. They explain the significance of individuals, groups, events and developments, and how they were influenced by the beliefs and values of the time period. They explain the factors that led to the Industrial Revolution and the effects that this had on Europe and the world.

Content Descriptions

Knowledge and understanding

Civics and Citizenship

Freedom and democracy
The freedoms that enable active participation in Australia’s democracy within the bounds of the law, including freedom of speech, association, assembly, religion and movement

WA8HAKUC1

Critical and creative thinking Personal and social capability Ethical understanding

The election process and how government is formed

For example:

- the structure and composition of parliament
- preferential voting and proportional representation
- voter eligibility, compulsory voting and the secret ballot

WA8HAKUC2

Numeracy Critical and creative thinking Ethical understanding

How citizens can participate in Australia's democracy, including use of the electoral system, contact with their elected representatives, use of lobby groups and direct action

For example:

- the ways that different groups in society are represented within government
- membership of lobby groups to advocate for specific causes

WA8HAKUC3

Critical and creative thinking Personal and social capability Ethical understanding

Law and order
How statute law is made in Australia through parliaments

WA8HAKUC4

Critical and creative thinking Ethical understanding

How common law is made in Australia through the courts

WA8HAKUC5

Critical and creative thinking Ethical understanding

The types of law in Australia, including criminal law and civil law, and the place of Aboriginal and Torres Strait Islander peoples' customary law

WA8HAKUC6

Ethical understanding Intercultural understanding

Young people's rights and responsibilities when interacting with law enforcement

For example:

- rights of a young person when questioned by the police
- responsibility to follow lawful directions

WA8HAKUC7

Personal and social capability Ethical understanding

Economics and Business

Australia's mixed market economy
The way markets in Australia influence decisions about the allocation of resources to the production of goods and services

For example:

- how markets answer the economic questions of what to produce, how to produce, for whom to produce and how much to produce

WA8HAKUE1

Critical and creative thinking

How the demand and supply model shows the interactions between consumers and businesses

For example:

- law of demand and the demand curve
- law of supply and the supply curve
- equilibrium price and equilibrium quantity

WA8HAKUE2

Numeracy Critical and creative thinking

Australia's system of taxation and why the government collects taxation revenue

For example:

- taxes paid by individuals and businesses such as income tax, GST and company tax
- how tax collected is used to pay for goods and services that benefit society

WA8HAKUE3

Numeracy Critical and creative thinking Ethical understanding

How the government is involved in the market by providing some types of goods and services that are not sufficiently supplied by the market

For example:

- healthcare
- education
- transport

WA8HAKUE4

Critical and creative thinking Ethical understanding

Work and financial decision-making
The reasons individuals work; the types of work they are involved in; and how they may derive an income

For example:

- reasons for work such as income, a sense of purpose and enjoyment
- types of work such as full-time, part-time, casual and contract
- ways to derive an income such as salary and wage-based work, commissions and return on investments in the form of profit or interest

WA8HAKUE5

Numeracy Critical and creative thinking Personal and social capability

Factors that influence major consumer and financial decisions

For example:

- price
- cost of borrowing money
- age and gender of consumers

WA8HAKUE6

Numeracy Critical and creative thinking Ethical understanding

Ways that individuals plan and budget to achieve short-term and long-term financial goals

For example:

- weekly savings to be able to purchase a mobile phone
- long-term financial plan to buy a house or car
- ways to achieve additional income such as mowing lawns

WA8HAKUE7

Numeracy Critical and creative thinking Personal and social capability

The rights and responsibilities of consumers and businesses in Australia

For example:

- warranties
- consumer guarantees
- product safety recalls

WA8HAKUE8

Critical and creative thinking Ethical understanding

Geography

Landforms, landscapes and hazards
The different types and spatial distribution of Australia's distinctive landscapes and significant landforms

For example:

- coastal, riverine, arid, mountain, karst landscapes such as Oondiri/the Nullarbor Plain, Mawurritjiyi/the Great Sandy Desert, Katta Morda /the Darling Ranges and Palyadi Manu/the Northwest Cape
- landforms such as Purnululu/Bungle Bungles, Bula Miyel/Bluff Knoll, Nambung/the Pinnacles and Katter Kich/Wave Rock

WA8HAKUG1

Numeracy

The spiritual, cultural and aesthetic value of landscapes and landforms for people, including Aboriginal and Torres Strait Islander peoples

For example:

- the Dreaming history of Purnululu/the Bungle Bungles
- the connection to Place of Whadjuk Noongar Peoples to Derbarl Yerrigan/Swan River
- the value of landscapes such as Cape le Grand National Park

WA8HAKUG2

Critical and creative thinking Ethical understanding Intercultural understanding

The causes, spatial distribution, impacts and responses to a geomorphic hazard

For example:

- volcanic eruptions, earthquakes, tsunami
- the principles of prevention, mitigation and preparedness in minimising the effects of a geomorphic hazard

WA8HAKUG3

Numeracy Critical and creative thinking

How the impacts of a geomorphic hazard are influenced by social, cultural and economic factors

For example:

- where people choose to live
- the availability of infrastructure
- the resources to respond to a hazard

WA8HAKUG4

Critical and creative thinking Ethical understanding

The causes and consequences of urbanisation in Australia and one other country from the Asia region

For example:

- economic and social opportunities that exist in urban areas such as employment and sporting clubs
- environmental challenges such as reduced air quality and increased water consumption
- consequences such as housing affordability and urban sprawl

WA8HAKUG5

Critical and creative thinking

The reasons for, and effects of, internal migration in Australia

For example:

- seasonal/cyclical migration, rural-to-urban and urban-to-rural migration
- economic opportunities such as employment in the mining industry in Western Australia
- effects such as loss of services in regional areas and retaining skilled workers

WA8HAKUG6

Critical and creative thinking

The reasons for, and effects of, international migration in Australia

For example:

- push factors such as employment availability, fear of persecution and natural disasters
- pull factors such as educational opportunities, political or religious freedom and attractive climates
- effects such as cultural exchange and availability of support services

WA8HAKUG7

Critical and creative thinking

History

Investigating medieval Europe
The way of life in a feudal society and the roles and relationships of different groups in society

For example:

- key groups in society such as nobility, knights and serfs
- how the manor system worked
- the role the Church played in society

WA8HAKUH1

Critical and creative thinking Ethical understanding Intercultural understanding

Continuity and change in society in at least one of the following areas: crime and punishment; military and defence systems; towns, cities and commerce

WA8HAKUH2

Critical and creative thinking Intercultural understanding

A significant individual, event or development in the medieval period

For example:

- individuals such as Joan of Arc, William the Conqueror and Charlemagne
- events such as The Battle of Hastings and The Crusades
- developments such as medieval manuscripts and changing relationship between Islam and the West

WA8HAKUH3

Critical and creative thinking Intercultural understanding

The transformation of the medieval world to the early modern world, including the causes, impacts and significance of at least one of the following on European society: the Black Death, scientific advancement, cultural and intellectual revival

WA8HAKUH4

Critical and creative thinking Ethical understanding Intercultural understanding

Industrial Revolution (1750–1914)
The social, economic, political, technological and/or environmental causes of the Industrial Revolution in Europe in the late 18th and 19th century

For example:

- the Agrarian Revolution that led to increased agricultural production and population growth
- technological advancements such as the steam engine and innovations in iron and steel production
- the accumulation of capital through trade, colonialism and the growth of financial institutions

WA8HAKUH5

Critical and creative thinking Intercultural understanding

The different experiences of men, women and/or children during the Industrial Revolution

WA8HAKUH6

Critical and creative thinking Personal and social capability Ethical understanding

The short- and long-term effects of the Industrial Revolution

For example:

- short-term effects such as the rapid growth of urban centres, the emergence of labour movements and trade unions, and increased pollution
- long-term effects, such as technological advancements, the rise of the middle class, political reforms and the expansion of European empires

WA8HAKUH7

Critical and creative thinking Intercultural understanding

Humanities and Social Sciences skills

Questioning and researching

Identify current understandings to consider possible gaps and/or misconceptions, new knowledge needed and challenges to personal perspectives

WA8HASKQ1

Literacy Critical and creative thinking

Construct a range of questions, propositions and/or hypotheses

WA8HASKQ2

Literacy Critical and creative thinking

Use a variety of methods to collect relevant information and/or data from a range of appropriate sources, such as print, digital, audio, visual and fieldwork

WA8HASKQ3

Literacy Numeracy Digital literacy

Select the best method for recording selected information and/or data

For example:

- graphic organisers, such as structured overviews for classifying or mind maps, for identifying relationships and overviews
- fieldwork, such as sketch drawings, a list of observable features and photographs

WA8HASKQ4

Literacy Numeracy Digital literacy

Identify differences in terms of origin and purpose between primary sources and secondary sources

For example:

- primary sources, such as cartoons, speeches and artefacts
- secondary sources, such as reference books, websites and documentaries

WA8HASKQ5

Literacy Critical and creative thinking

Use appropriate ethical protocols to plan and conduct an inquiry

For example:

- seek permission to use personal photos
- seek permission when planning a visit to Aboriginal cultural land
- use specific formats for acknowledging other people's information

WA8HASKQ6

Personal and social capability Ethical understanding Intercultural understanding

Analysing

Use criteria to select relevant information and/or data such as accuracy, reliability, currency and usefulness to the question

WA8HASKA1

Literacy Critical and creative thinking

Interpret information and/or data to identify key relationships and/or trends displayed in various formats

For example:

- change over time in a series of images
- identify spatial distributions from a map

WA8HASKA2

Literacy Numeracy Critical and creative thinking

Identify points of view and perspectives, attitudes and/or values in information and/or data

For example:

- from tables, statistics, graphs, models, cartoons, maps or timelines

WA8HASKA3

Literacy Numeracy Critical and creative thinking

Translate information and/or data from one format to another

For example:

- from a table to a graph

WA8HASKA4

Literacy Numeracy Critical and creative thinking

Apply subject-specific skills and concepts in familiar and new situations

WA8HASKA5

Literacy Critical and creative thinking

Evaluating

Draw evidence-based conclusions by evaluating information and/or data to generate a range of alternatives and plan for action in response to contemporary events, challenges, developments, issues, problems and/or phenomena; make comparisons; evaluate costs (disadvantages) and benefits (advantages); and infer relationships

WA8HASKE1

Literacy Numeracy Critical and creative thinking

Communicating and reflecting

Represent information and/or data using appropriate formats to suit audience and purpose

For example:

- tables/graphs, visual displays, models, timelines, maps, other graphic organisers

WA8HASKC1

Literacy Numeracy Digital literacy

Develop texts, particularly descriptions and explanations, using appropriate subject-specific terminology and concepts that use evidence to support findings, conclusions and/or arguments, from a range of sources

WA8HASKC2

Literacy Critical and creative thinking

Reflect on learning to review original understandings and/or determine actions in response to events, challenges, developments, issues, problems and/or phenomena

WA8HASKC3

Critical and creative thinking

Year 9

Year Level Description

In the middle adolescence phase of schooling, teaching and learning programs encourage students to develop an open and questioning view of themselves as active participants in their society and the world.

In Humanities and Social Sciences students, build on their understanding of important concepts and continue to develop their awareness of the complexity of the natural environment, social issues and the impact of technological advances. Students consider how the relationship between knowledge, technology and values influences their own role within society.

In Year 9, students develop increasing independence in critical thinking and skill application, which includes questioning, researching, analysing, evaluating, communicating and reflecting. They apply these skills to investigate events, developments, issues and phenomena, both historical and contemporary.

Students continue to build on their understanding of the concepts of the Westminster system, democracy, democratic values, justice and participation. They examine the role of political parties and independent representatives, and the way citizens' decisions are shaped during an election campaign. Students investigate how Australia's court system works in support of a democratic and just society.

Students are introduced to the concepts of specialisation and trade while continuing to further their understanding of the key concepts of scarcity, making choices, interdependence, and allocation and markets. They examine the connections between households and businesses, and the financial, government and overseas sectors through the flow of goods, services and resources in a global economy. Students develop an understanding of the risks and rewards involved in investing money and explore ways to practise financial management.

The concepts of place, space, environment, interconnection, sustainability and change continue to be developed as a way of thinking, which enable students to inquire into the production of food and fibre, the role of the biotic environment and to explore how people, through their choices and actions, are connected to places in a variety of ways. Students apply this understanding to a wide range of places and environments at a range of scales, from local to global, and in a range of locations.

Students develop their historical understanding through key concepts, including evidence, continuity and change, cause and effect, perspectives, empathy, significance and contestability. These concepts are investigated within the historical context of Australia's colonial history and World War I. They consider how the experiences of people and groups reflected the attitudes of these time periods, and the significance of both colonisation and World War I.

Achievement Standard

By the end of the year:

Students construct a range of questions and hypotheses involving cause and effect, patterns and trends, and different perspectives. They use a range of methods to select, record and organise relevant information and/or data from multiple sources. When interpreting sources, students identify their origin and purpose, and draw conclusions about their usefulness. They examine sources to compare different points of view/perspectives and describe different interpretations. Students analyse information and/or data to identify simple patterns, trends, relationships and/or change over time. They draw evidence-based conclusions, using information and/or data to consider multiple perspectives and/or to propose action in response to contemporary challenges. Students develop a range of texts appropriate to the type of discussion and/or explanation required. They use subject-specific terminology and concepts, and provide evidence from a range of sources to support conclusions, and acknowledge these sources.

Students describe some ways individuals and political parties participate within the electoral system in Australia's democracy and how their voting preferences can be shaped by external influences. They describe Australia's court system and how the courts resolve disputes. Students identify the principles of justice and the threats to these principles.

Students explain the interdependence between Australia and other economies by identifying Australia's trading partners and describe how specialisation results in the exchange of goods and services between countries. They describe the risks and rewards that result from making consumer and financial choices.

Students explain the spatial variation and characteristics of biomes and the interconnections between people, places and environments. They identify the cause and effect of these interconnections, and predict possible implications for people, places and natural environments, now and in the future. Students make inferences about the spatial outcomes of the interconnections between people, places and environments.

Students explain the different experiences of Australia's colonial history, and the causes and effects of World War I over both the short and long term, including its significance. Students use evidence to explain patterns of change and continuity over time and identify the motives and actions of the individuals and groups at that time.

Content Descriptions

Knowledge and understanding

Civics and Citizenship

The role of political parties and independent representatives in Australia’s system of government

For example:

- the key principles of the major political parties in Australia
- the emerging influence of independent representatives
- the concepts of minority government and balance of power

WA9HAKUC1

Personal and social capability **Ethical understanding**

How citizens’ choices are shaped at election time

For example:

- media
- opinion polls
- political party campaigns

WA9HAKUC2

Critical and creative thinking **Personal and social capability** **Ethical understanding**

How social media and other emerging technologies are used to influence people’s understanding of political issues

For example:

- how media represents different groups in Australian society
- the role of factors such as data harvesting, algorithms and confirmation bias in controlling the information voters are

exposed to

WA9HAKUC3

Critical and creative thinking Personal and social capability Ethical understanding

How young people can participate in and contribute to civic life in Australia and as a global citizen

For example:

- young people's contributions to civic life in Australia such as Young Australian of the Year recipients
- the characteristics of global citizens such as a broad understanding of the world, engagement in their communities and collaboration with others to address challenges
- involvement in diverse community groups such as cultural groups, sporting and volunteer organisations

WA9HAKUC4

Critical and creative thinking Personal and social capability Ethical understanding

Australian court system
The key features and jurisdictions of Australia's court system, and the operations of courts

For example:

- the court hierarchy
- the role of precedent

WA9HAKUC5

Ethical understanding

The key principles of Australia's justice system, including equality before the law, independent judiciary and right of appeal

WA9HAKUC6

Ethical understanding

The factors that can undermine the application of the principles of justice

For example:

- bribery, coercion of witnesses, trial by media and barriers to equality of access to justice
- the different experiences of people with the justice system
- case studies such as the wrongful conviction of John Button or Lindy Chamberlain's trial by media

WA9HAKUC7

Critical and creative thinking Ethical understanding

Economics and Business

Australia in the global economy
The interdependence of households, businesses, and the financial, government and overseas sectors using the five-sector circular flow model

For example:

- financial sector – savings and investments
- government sector – taxation and government spending
- overseas sector – imports and exports

WA9HAKUE1

Numeracy

Who Australia trades with; what they trade; and the reasons for this trade, including specialisation

WA9HAKUE2

Numeracy Critical and creative thinking

Why and how participants in the global economy are dependent on each other; the effects of globalisation; and the impacts of global events on Australian consumers and businesses

For example:

- global dependence through global supply chains and transnational corporations
- effects of globalisation such as availability of goods and services, access to larger markets, environmental degradation and local producers competing in the international market
- disruptions to global supply chains due to global events such as pandemics, natural disasters, international conflicts and economic crises

WA9HAKUE3

Critical and creative thinking Ethical understanding

Opportunities, risks and rewards
How businesses seek to create and maintain a competitive advantage in a global and/or domestic market

For example:

- creating a product that is unique to a market
- the ability to generate more profit than competitors by reducing costs or increasing revenue

WA9HAKUE4

Critical and creative thinking Personal and social capability

How Aboriginal and Torres Strait Islander businesses develop opportunities in the market

For example:

- the business opportunities associated with environmental stewardship, such as rehabilitation and conservation
- employment and social contribution such as tourism providers in regional and remote Australia providing job opportunities
- innovations such as the use of native products for their environmental, medicinal or cosmetic benefits

WA9HAKUE5

Critical and creative thinking Personal and social capability Intercultural understanding

Why and how individuals manage financial investment risks and rewards

For example:

- types of investment such as shares, real estate and superannuation
- setting investment goals

WA9HAKUE6

Numeracy Personal and social capability Ethical understanding

The ways consumers can practise personal financial safety

For example:

- understanding and managing debt such as credit cards and other consumer finance providers
- awareness of scams and strategies to protect consumers from scams, using information from sources such as Scamwatch
- responding to the risk of identity theft through improvements in cybersecurity, such as using multifactor authentication

WA9HAKUE7

Critical and creative thinking Personal and social capability Ethical understanding

Geography

Biomes and food security
The characteristics and spatial distribution of biomes as regions with distinctive climates, soils and vegetation

For example:

- forests
- grasslands
- deserts

WA9HAKUG1

Numeracy

The ways that humans in the production of food and fibre have altered some biomes

For example:

- through vegetation clearance, introduction of exotic species, drainage, terracing, irrigation
- the wetlands of the Swan Coastal Plains have been drained for market gardening
- clearing of woodlands throughout the Southwest of Western Australia for wheat and sheep farming

WA9HAKUG2

Critical and creative thinking

The challenges to food production, including climate change and at least one other of the following: land and water degradation, shortage of fresh water, competing land uses in Australia and the world

WA9HAKUG3

Numeracy Critical and creative thinking Ethical understanding

The effects of world population growth on global food security; the solutions for Australia and the world to achieve food security; and the implications for environmental sustainability

WA9HAKUG4

Numeracy Critical and creative thinking Ethical understanding

Geographies of interconnections
The perceptions people have of place, and how this influences their connections to different places

For example:

- economic, cultural, historical and spiritual connections
- dual naming of places such as Mandjoogoordap/Mandurah and Gutharraguda/Shark Bay

WA9HAKUG5

Critical and creative thinking Ethical understanding Intercultural understanding

The ways transportation, and information and communication technologies (ICT) are used to connect people to services, information and people in other places

For example:

- Royal Flying Doctors providing medical and dental services to rural and remote locations
- the use of the School of the Air to enable students in remote places to access education

- the use of ICT to make it possible for places such as India and the Philippines to provide a range of global telecommunication services

WA9HAKUG6

Critical and creative thinking Digital literacy

The ways that places and people are interconnected with other places through trade in goods and services, at different scales

For example:

- how the supply chains of a product show the interconnections of trade
- the 'glocalisation' of fast food and fashion

WA9HAKUG7

Numeracy Critical and creative thinking

The effects of people's travel, recreation, cultural or leisure choices on places, and the implications for the sustainability of these places

For example:

- how management plans for national parks, such as Kalbarri National Park, bring together cultural and scientific knowledge and experience
- economic, social and environmental impacts of tourism such as the jobs provided in local industry, sharing of culture and stress on local environments

WA9HAKUG8

Critical and creative thinking

History

Australian history (1750–1914)
The causes of European imperial expansion and the movement of peoples in the late 18th and early 19th centuries

For example:

- how and why nations competed with one another for territorial control and strategic advantage
- seeking new markets, raw materials and trading opportunities to support their economies
- how advances in navigation, shipbuilding, and weaponry made long-distance travel and conquest more feasible

WA9HAKUH1

Critical and creative thinking Ethical understanding Intercultural understanding

The effects of colonisation on Aboriginal and Torres Strait Islander peoples

For example:

- the doctrine of terra nullius providing legal justification for British colonisation of Australia without treaty or negotiation
- Frontier Wars, such as the 1834 Pinjarra Massacre and the 1894 Battle of Windjana Gorge
- the denial of Aboriginal rights enshrined through legislation, such as the Aborigines Act 1905 (Western Australia)

WA9HAKUH2

Critical and creative thinking Ethical understanding Intercultural understanding

Significant individuals and events in the development of Australian society during the time period

For example:

- individuals such as Arthur Phillip, Elizabeth and John Macarthur, and Catherine Helen Spence
- events such as the establishment of the Australian penal colony in 1788 and the start of the Gold Rush in 1851
- conflict such as the Frontier Wars, the Rum Rebellion and the Eureka Stockade

WA9HAKUH3

Critical and creative thinking Intercultural understanding

Different experiences of Aboriginal and Torres Strait Islander peoples, colonisers and non-European settlers

For example:

- Aboriginal and Torres Strait Islander resistance fighters such as Yagan, Jandamarra, Truganini and Pemulwuy
- colonisers such as free settlers and squatters
- Chinese miners on the goldfields such as the Lambing Flats Riots

WA9HAKUH4

Critical and creative thinking Ethical understanding Intercultural understanding

Investigating World War I
The causes of World War I and the reasons why people enlisted to fight in the war for Australia

For example:

- causes such as militarism, alliances, imperialism and nationalism
- reasons to enlist such as patriotism, a sense of adventure or duty, employment, peer pressure or social expectations and belief in the cause

WA9HAKUH5

Critical and creative thinking Ethical understanding Intercultural understanding

The places where people from Australia fought, including Gallipoli and the Western Front, and the types of warfare during World War I

WA9HAKUH6

Critical and creative thinking

The impacts of World War I on the Home Front including at least two of the following: the use of propaganda, the role of women, political debates about conscription, relationships with the British Empire, the experiences of returned soldiers including Aboriginal and Torres Strait Islander peoples

WA9HAKUH7

Critical and creative thinking Ethical understanding

The commemoration of World War I, including debates about the nature and significance of the Anzac legend

WA9HAKUH8

Critical and creative thinking Ethical understanding Intercultural understanding

Humanities and Social Sciences skills

Questioning and researching

Identify current personal knowledge, gaps, misconceptions, currency of information, personal perspective and possible perspectives of others

WA9HASKQ1

Literacy Numeracy Critical and creative thinking

Construct, select and evaluate a range of questions and hypotheses involving cause and effect, patterns and trends, and different perspectives

WA9HASKQ2

Literacy Numeracy Critical and creative thinking

Analyse and clarify the purpose of an inquiry using appropriate methodologies, ethical protocols and concepts to plan for, and inform, an investigation

WA9HASKQ3

Literacy Critical and creative thinking Ethical understanding

Use a range of methods to collect, select, record and organise relevant and reliable information and/or data from multiple sources that reflects the type of analysis of information that is needed with and without the use of digital and spatial technologies

For example:

- collection methods such as questionnaires and surveys
- records of information such as tables, field sketches and annotated diagrams

WA9HASKQ4

Literacy Numeracy Digital literacy

Identify the origin, purpose and context of primary sources and/or secondary sources

For example:

- primary sources such as cartoons, speeches and artefacts
- secondary sources such as reference books, websites and documentaries

WA9HASKQ5

Literacy Critical and creative thinking

Use appropriate ethical protocols, including specific formats for acknowledging information produced by others and understand that these formats vary between organisations

WA9HASKQ6

Personal and social capability Ethical understanding Intercultural understanding

Analysing

Use criteria to analyse the reliability, bias, usefulness and currency of primary sources and/or secondary sources

WA9HASKA1

Literacy Critical and creative thinking Intercultural understanding

Analyse information and/or data in different formats

For example:

- cause and effect relationships
- comparisons
- change over time

WA9HASKA2

Literacy Numeracy Critical and creative thinking

Account for different interpretations and points of view/perspectives in information and/or data

For example:

- data representations such as tables, statistics, graphs
- visual representations such as cartoons, maps, timelines, models
- text representations such as newspapers

WA9HASKA3

Literacy Numeracy Critical and creative thinking

Analyse the 'big picture'

For example:

- put information and/or data into different contexts
- reconstruct information by identifying new relationships
- identify missing viewpoints or gaps in knowledge

WA9HASKA4

Literacy Critical and creative thinking

Apply subject-specific skills and concepts in familiar, new and hypothetical situations

WA9HASKA5

Literacy Critical and creative thinking

Evaluating

Draw evidence-based conclusions by evaluating information and/or data, taking into account ambiguities and multiple perspectives; negotiate and resolve contentious issues; propose individual and collective action in response to contemporary events, challenges, developments, issues, problems and/or phenomena

WA9HASKE1

Literacy Numeracy Critical and creative thinking

Critically evaluate information and/or data and ideas from a range of sources

For example:

- to make generalisations and inferences
- to propose explanations for patterns, trends, relationships and anomalies
- to predict outcomes

WA9HASKE2

Literacy Numeracy Critical and creative thinking

Communicating and reflecting

Select a range of appropriate formats based on their effectiveness to suit audience and purpose, using relevant digital technologies as appropriate

WA9HASKC1

Literacy Critical and creative thinking Digital literacy

Reflect on why all findings are tentative

For example:

- the changing nature of knowledge
- changes in circumstances
- changes in values

WA9HASKC2

Literacy Critical and creative thinking Personal and social capability

Develop texts, particularly explanations and discussions, using evidence from a range of sources to support conclusions and/or arguments

WA9HASKC3

Literacy Numeracy Critical and creative thinking

Deconstruct and reconstruct the collected information and/or data into a form that identifies the relationship between the information and the hypothesis, using subject-specific conventions, terminology and concepts

WA9HASKC4

Literacy Numeracy Critical and creative thinking

Compare evidence to substantiate judgements

For example:

- use information and/or data from different places or times
- use tables, graphs, models, theories

WA9HASKC5

Literacy Critical and creative thinking

Generate a range of viable options in response to an issue or event to recommend and justify a course of action, and predict the potential consequences of the proposed action

WA9HASKC6

Literacy Critical and creative thinking Personal and social capability

Year 10

Year Level Description

In the middle adolescence phase of schooling, teaching and learning programs encourage students to develop an open and questioning view of themselves as active participants in their society and the world.

In Humanities and Social Sciences, students build on their understanding of important concepts and continue to develop their awareness of the complexity of the natural environment, social issues and the impact of technological advances. Students consider how the relationship between knowledge, technology and values influences their own role within society.

In Year 10, students develop increasing independence in critical thinking and skill application, which includes questioning, researching, analysing, evaluating, communicating and reflecting. They apply these skills to investigate events, developments, issues and phenomena, both historical and contemporary.

Students continue to build on their understanding of the concepts of democracy, democratic values, justice, and rights and responsibilities by exploring Australia's roles and responsibilities at a global level and its international legal obligations. They inquire into the values and practices that enable a resilient democracy to be sustained.

Students are introduced to the concept of economic performance and living standards while continuing to further their understanding of the concepts of making choices, interdependence, specialisation, and allocation and markets through examining contemporary issues, events and/or case studies. They explore the nature of externalities and investigate the role of governments in managing economic performance to improve living standards. They inquire into the ways businesses can manage their workforces to improve productivity and adapt to future conditions.

The concepts of place, space, environment, interconnection, sustainability and change continue to be developed as a way of thinking, through an applied focus on the management of environmental change on the full range of scales, from local to global and in a range of locations. The geography of human wellbeing is investigated through comparison between Australia and less economically developed countries.

Students develop their historical understanding through key concepts, including evidence, continuity and change, cause and effect, perspectives, empathy, significance and contestability. These concepts are investigated within the historical context of the modern world and Australia from the lead up to World War II to the present, with an emphasis on Australia in its global context. They consider the impacts of world events on human rights and freedom of different groups of people.

Achievement Standard

By the end of the year:

Students construct a range of questions and hypotheses involving cause and effect, patterns and trends, and different perspectives. They use a range of methods to select, record and organise relevant information and/or data from multiple sources. When interpreting sources, students identify their origin and purpose, and draw conclusions about their usefulness. They examine sources to compare different points of view/perspectives and describe different interpretations. Students analyse information and/or data to identify simple patterns, trends, relationships and/or change over time. They draw evidence-based conclusions, using information and/or data to consider multiple perspectives and/or to propose action in response to contemporary challenges. Students develop a range of texts appropriate to the type of discussion and/or explanation required. They use subject-specific terminology and concepts, and provide evidence from a range of sources to support conclusions, and acknowledge these sources.

Students describe key features of the Westminster system and Australia's democratic values. They make comparisons between Australia's democracy and the political system of one other country. Students identify the international agreements Australia has ratified, and make connections between these agreements and the rights and responsibilities of citizens. They explain how Australia's democracy, and other democracies, may be undermined, and identify the safeguards that protect Australia's democratic system.

Students use economic indicators to analyse the economic performance of the Australian economy. They describe how government policy is used to manage the economy and improve economic performance and living standards, including the redistribution of income and wealth. Students describe how businesses respond to changing economic conditions, and the processes that businesses can use to improve productivity. They explain the challenges of ethical decision-making in business, and the future implications of changes to the working environment.

Students describe how the places in which people live influence their wellbeing and opportunities. They describe the interconnections between people and natural environments, and compare how the characteristics of places and natural environments can be influenced, changed and managed by people over time. Students predict the consequences of the changes, and describe the alternate views on strategies to sustainably manage a geographical challenge.

Students identify the causes and effects of World War II and the development of people's rights and freedoms, describing their

significance from a range of perspectives. They refer to key events, the actions of individuals and groups, and beliefs and values, to explain patterns of change and continuity over time. Students describe different interpretations of the past, and identify the evidence used to support these interpretations.

Content Descriptions

Knowledge and understanding

Civics and Citizenship

Protecting democracy
The key features and values of Australia's system of government compared with another system of government in the Asia–Pacific region

For example:

- democratic elections
- separation of powers
- representative and responsible government

WA10HAKUC1

Critical and creative thinking Ethical understanding Intercultural understanding

The threats to Australia's democracy and other democracies

For example:

- the influence of vested interests, organised crime, corruption and lawlessness
- misinformation and disinformation in the media
- the rise of populism and identity politics in Australia and other Western democracies

WA10HAKUC2

Critical and creative thinking Ethical understanding Intercultural understanding

The safeguards that protect Australia's democratic system and society, including shared values and the right to dissent within the bounds of the law

For example:

- the importance of the free media
- anti-discrimination laws

WA10HAKUC3

Critical and creative thinking Personal and social capability Ethical understanding

The role of the High Court, including interpreting the Constitution

For example:

- constitutional cases such as Brown v Tasmania [2017] – World Heritage
- common law cases such as Mabo v Queensland (No.2) [1992] – Native Title
- court of appeal, such as Elisha v Vision Australia [2024] HCA 50

WA10HAKUC4

Critical and creative thinking Personal and social capability Ethical understanding

Australia as a global citizen
Australia's roles and responsibilities at a global level

For example:

- provision of foreign aid
- peacekeeping
- participating in international organisations such as the United Nations

WA10HAKUC5

Critical and creative thinking Ethical understanding Intercultural understanding

The international agreements the Australian Government has ratified and how they shape policies and laws, including their response to the United Nations Declaration on the Rights of Indigenous Peoples

For example:

- the formal endorsement of the United Nations Declaration on the Rights of Indigenous Peoples in 2009 by the federal government
- Australia's legal obligations under the Paris Agreement (1996) and Conventions relating to the Status of Refugees (1951)
- the Convention on the Rights of the Child (1989)

WA10HAKUC6

Critical and creative thinking Ethical understanding Intercultural understanding

Economics and Business

Economic performance and living standards

How the business cycle model shows changes in economic activity over time

WA10HAKUE1

Numeracy Critical and creative thinking

Indicators of economic performance and how Australia's economy is performing including the economic growth rate, unemployment rate and inflation rate

WA10HAKUE2

Numeracy Critical and creative thinking

The links between economic performance and living standards and the variations that exist within Australia

For example:

- the ways material living standards can be measured, such as gross domestic product per capita and housing affordability

WA10HAKUE3

Literacy Numeracy Critical and creative thinking

The distribution of income and wealth in the economy and the ways in which governments can redistribute income

For example:

- the measures and models of income and wealth inequality such as Gini coefficient and the Lorenz curve
- types of taxation such as progressive and regressive taxation
- transfer payments such as pensions, unemployment benefits, and one-off government payments

WA10HAKUE4

Numeracy Critical and creative thinking

The ways that governments influence the economy to improve economic performance and living standards, and to manage the effects of externalities

For example:

- government-funded tertiary education to address skills shortages
- mandating compulsory superannuation payments for all workers
- banning single-use plastics to reduce the cost of pollution

WA10HAKUE5

Critical and creative thinking Ethical understanding

The changing world of business
Ways that businesses respond to changing economic conditions

For example:

- expenditure on research and development
- marketing strategies
- adjusting output to reflect consumer spending

WA10HAKUE6

Critical and creative thinking

Processes that businesses use to improve productivity

For example:

- workforce training and development
- investment in applications of technology
- use of just-in-time inventory systems

WA10HAKUE7

Critical and creative thinking Ethical understanding

The role of ethical decision-making in production and consumption

For example:

- current ethical issues for business such as discriminatory workplace practices and labour conditions
- campaigns used to encourage ethical practices such as animal rights activism and supporting fair trade
- intellectual property rights such as the role of artificial intelligence in the creative industries and the appropriation of cultural intellectual property for commercial gain

WA10HAKUE8

Critical and creative thinking Personal and social capability Ethical understanding

The way the work environment is changing in Australia and the implications for current and future work

For example:

- megatrends such as demographic changes, impactful technology and economic power shifts
- emerging workforce and employment trends such as the gig economy and casualisation of the workforce

WA10HAKUE9

Critical and creative thinking Ethical understanding

Geography

Environmental change and management
The human-induced changes that challenge the sustainability of natural environments

For example:

- water and atmospheric pollution
- degradation of land

WA10HAKUG1

Critical and creative thinking Ethical understanding

The environmental world views of people, including Aboriginal and Torres Strait Islander peoples' approaches to custodial responsibilities, and their implications for environmental management

For example:

- the role of Aboriginal and Torres Strait Islander peoples' relationships with the environment, such as cultural burning
- conservationists' actions to prioritise the protection of natural ecosystems
- decisions that prioritise economic gain over environmental sustainability

WA10HAKUG2

Critical and creative thinking Ethical understanding Intercultural understanding

The causes and consequences of one environmental change at a local, national or global scale

WA10HAKUG3

Critical and creative thinking

The responses to manage the environmental change and the application of environmental, economic and social criteria in evaluating these management responses

WA10HAKUG4

Critical and creative thinking Personal and social capability

Geographies of human wellbeing
The methods used to measure spatial variations in human wellbeing and development

For example:

- material and non-material indicators of wellbeing
- GDP per capita
- the UN Human Development Index

WA10HAKUG5

Numeracy Critical and creative thinking Ethical understanding

The reasons for spatial variations between Australia and one less economically developed country in selected indicators of human wellbeing

For example:

- environmental factors such as the suitability of land for agriculture, availability of natural resources and climatic conditions
- social factors such as culture, population sizes and impact of historical events
- economic factors such as income inequality, employment opportunities and access to resources

WA10HAKUG6

Critical and creative thinking Ethical understanding Intercultural understanding

The issues affecting human wellbeing and development in Australia and one less economically developed country

For example:

- access to education, healthcare, employment opportunities and fresh food

WA10HAKUG7

Critical and creative thinking Ethical understanding Intercultural understanding

The role of international and national government and non-government organisations' initiatives in improving human wellbeing in Australia and other countries

WA10HAKUG8

Critical and creative thinking Ethical understanding Intercultural understanding

History

Investigating World War II
The causes of World War II

For example:

- the Treaty of Versailles
- the impact of the Great Depression
- the rise of totalitarian regimes in Germany, Italy and Japan
- the policy of appeasement

WA10HAKUH1

Critical and creative thinking Ethical understanding

The experiences of service personnel from Australia during World War II, including at least one of the following: prisoners of war, the North Africa Campaign, Kokoda, the fall of Singapore

WA10HAKUH2

Critical and creative thinking Personal and social capability

The impact of World War II on the Home Front, including at least one of the following: the bombing of Darwin, the changing roles of women, the use of wartime government controls

WA10HAKUH3

Critical and creative thinking Personal and social capability

Significant events of World War II, including the Holocaust and use of the atomic bomb

WA10HAKUH4

Critical and creative thinking Ethical understanding Intercultural understanding

Investigating rights and freedoms
The origins and significance of the Universal Declaration of Human Rights, including Australia's involvement in the development of the declaration

WA10HAKUH5

Critical and creative thinking Ethical understanding Intercultural understanding

The background to Aboriginal and Torres Strait Islander peoples' campaigns for rights and freedoms before 1965

For example:

- discriminatory legislation and policies such as the Aborigines Act 1905 (Western Australia) and the Stolen Generations
- the 1938 Day of Mourning
- the US civil rights movement

WA10HAKUH6

Critical and creative thinking Ethical understanding Intercultural understanding

The significant events in the movement for the civil rights of Aboriginal and Torres Strait Islander peoples and the extent to which they contributed to change

For example:

- referendums such as those held in 1967 and 2023
- direct action such as the 1946 Pilbara Strike, Freedom Rides and the Tent Embassy in Canberra
- development of legislation such as the Commonwealth Electoral Act 1962 and the Mabo High Court decision/Native Title Act 1993

WA10HAKUH7

Critical and creative thinking Ethical understanding Intercultural understanding

The continuing efforts to create change in the rights and freedoms in Australia for Aboriginal and Torres Strait Islander peoples, and one other group

For example:

- the importance of truth-telling and historical acceptance of injustices such as the Bringing Them Home report (the Stolen Generations)
- the challenges and opportunities following the Voice Referendum
- Acts of Parliament such as the Racial Discrimination Act 1975 and the Equal Opportunity Act 1984
- other groups such as women or migrants

WA10HAKUH8

Personal and social capability Ethical understanding Intercultural understanding

Humanities and Social Sciences skills

Questioning and researching

Identify current personal knowledge, gaps, misconceptions, currency of information, personal perspective and possible perspectives of others

WA10HASKQ1

Literacy Numeracy Critical and creative thinking

Construct, select and evaluate a range of questions and hypotheses involving cause and effect, patterns and trends, and different perspectives

WA10HASKQ2

Literacy Numeracy Critical and creative thinking

Analyse and clarify the purpose of an inquiry using appropriate methodologies, ethical protocols and concepts to plan for, and inform, an investigation

WA10HASKQ3

Literacy Critical and creative thinking Ethical understanding

Use a range of methods to collect, select, record and organise relevant and reliable information and/or data from multiple sources that reflects the type of analysis of information that is needed with and without the use of digital and spatial technologies

For example:

- collection methods such as questionnaires and surveys
- records of information such as tables, field sketches and annotated diagrams

WA10HASKQ4

Literacy Numeracy Digital literacy

Identify the origin, purpose and context of primary sources and/or secondary sources

For example:

- primary sources such as cartoons, speeches and artefacts
- secondary sources such as reference books, websites and documentaries

WA10HASKQ5

Literacy Critical and creative thinking

Use appropriate ethical protocols, including specific formats for acknowledging information produced by others and understand that these formats vary between organisations

WA10HASKQ6

Personal and social capability Ethical understanding Intercultural understanding

Analysing

Use criteria to analyse the reliability, bias, usefulness and currency of primary sources and/or secondary sources

WA10HASKA1

Literacy Critical and creative thinking Intercultural understanding

Analyse information and/or data in different formats

For example:

- cause and effect relationships
- comparisons
- change over time

WA10HASKA2

Literacy Numeracy Critical and creative thinking

Account for different interpretations and points of view/perspectives in information and/or data

For example:

- data representations such as tables, statistics, graphs
- visual representations such as cartoons, maps, timelines, models
- text representations such as newspapers

WA10HASKA3

Literacy Numeracy Critical and creative thinking

Analyse the 'big picture'

For example:

- put information and/or data into different contexts
- reconstruct information by identifying new relationships
- identify missing viewpoints or gaps in knowledge

WA10HASKA4

Literacy Critical and creative thinking

Apply subject-specific skills and concepts in familiar, new and hypothetical situations

WA10HASKA5

Literacy Critical and creative thinking

Evaluating

Draw evidence-based conclusions by evaluating information and/or data, taking into account ambiguities and multiple perspectives; negotiate and resolve contentious issues; propose individual and collective action in response to contemporary events, challenges, developments, issues, problems and/or phenomena

WA10HASKE1

Literacy Numeracy Critical and creative thinking

Critically evaluate information and/or data and ideas from a range of sources

For example:

- to make generalisations and inferences
- to propose explanations for patterns, trends, relationships and anomalies
- to predict outcomes

WA10HASKE2

Literacy Numeracy Critical and creative thinking

Communicating and reflecting

Select a range of appropriate formats based on their effectiveness to suit audience and purpose, using relevant digital technologies as appropriate

WA10HASKC1

Literacy Numeracy Digital literacy

Reflect on why all findings are tentative

For example:

- the changing nature of knowledge
- changes in circumstances
- changes in values

WA10HASKC2

Literacy Critical and creative thinking Personal and social capability

Develop texts, particularly explanations and discussions, using evidence from a range of sources to support conclusions and/or arguments

WA10HASKC3

Literacy Numeracy Critical and creative thinking

Deconstruct and reconstruct the collected information and/or data into a form that identifies the relationship between the information and the hypothesis, using subject-specific conventions, terminology and concepts

WA10HASKC4

Literacy Numeracy Critical and creative thinking

Compare evidence to substantiate judgements

For example:

- use information and/or data from different places or times
- use tables, graphs, models, theories

WA10HASKC5

Literacy Critical and creative thinking

Generate a range of viable options in response to an issue or event to recommend and justify a course of action, and predict the potential consequences of the proposed action

WA10HASKC6

Literacy Critical and creative thinking Personal and social capability
